- (a) operations to ensure the preservation of goods during transport and storage, such as ventilation, spreading out, drying, chilling, placing in salt, sulphur dioxide or other aqueous solution, removal of damaged parts and similar operations;

(6) Where materials containing any element imported from outside the Common Market meet the conditions specified in paragraph (1) those materials shall be regarded as containing no such element.

**Repair,
renovation
or
improvement of
goods**

5. Goods which undergo a process of repair, renovation or improvement within the Common Market, having been consigned for that purpose from Trinidad and Tobago to a consignee in another Member State shall, on their return to Trinidad and Tobago, be treated for the purpose of reimportation only in like manner as goods which are of Common Market origin, provided that the goods are re-consigned directly to Trinidad and Tobago and the value of materials imported from outside the Common Market or of undetermined origin which have been used in the process of repair, renovation or improvement does not exceed—

- (a) in the case where the goods have undergone the process of repair, renovation or improvement in a More Developed Country, sixty-five per cent of the cost of repair, renovation or improvement;
- (b) in the case where the goods have undergone the process of repair, renovation or improvement in a Less Developed Country, eighty per cent of the cost of repair, renovation or improvement.

**Materials :
Determination of
origin**

6. (1) In determining for the purposes of paragraph (1)(a) of regulation 4 where goods are grown, produced, manufactured, repaired, renovated or improved, energy, fuel, plant, machinery and tools including any materials used in the maintenance of such plant, machinery or tools, shall be deemed to have been grown, produced, manufactured, repaired, renovated or improved in the Common Market.

(2) In determining for the purposes of paragraph (1)(b) of regulation 4 where any goods were grown, produced, manufactured, repaired, renovated or improved, any of the following (whether or not imported into the Common Market or containing any element so imported) used in their production, manufacture, repair, renovation or improvement shall be deemed not to have been imported into the Common Market and not to contain any element so imported, that is to say—

- (a) energy, fuel, plant, machinery and tools so used in the Common Market, including any materials used in the maintenance of such plant, machinery or tools;
- (b) materials which, had they been imported into Trinidad and Tobago in the state in which they were used in the production, manufacture, repair, renovation or improvement of those goods, would have fallen to be treated under provisions of paragraph (1)(a) of regulation 4 as grown, produced, manufactured, repaired, renovated or improved in the Common Market.

(3) In any case in which there is insufficient information on which to determine whether or not any materials were imported into the Common Market or contain any element so imported, those materials shall be deemed to have been so imported.

**Materials :
Determination of
value**

7. (1) This regulation shall have effect for the purpose of determining the value of any materials imported into the Common Market and used in the production or manufacture of any goods.

(2) Subject to the provisions of paragraph (4) the value of the materials referred to in paragraph (1) shall be taken to be the aggregate of the following amounts—

- (a) the amount equivalent to the value attributed to those materials on their last clearance for home use or for temporary admission by the customs authorities in the Member State in which they

were used in the production or manufacture of the goods concerned, less such portion of the cost of any transportation through any other part of the Common Market as may have been taken into account in arriving at the value attributed as aforesaid; and

- (b) the amount equivalent to the cost of any insurance and freight on those materials (other than the cost of transport in the Common Market) to the extent that such amount was not taken into account in arriving at the value attributed to those materials.

(3) Subject to the provisions of paragraph (4), where the value of the materials referred to in paragraph (1) cannot be determined in accordance with paragraph (2), the value of any such materials shall be taken to be the amount equivalent to the purchase price paid on the earliest ascertainable sale of those materials in the Member State in which they were used in the production or manufacture of the goods concerned.

(4) Where in determining the value of any materials under this regulation, it appears to the Comptroller—

- (a) on a determination in accordance with paragraph (2), that the value attributed to those materials at the relevant time by any customs authorities was not arrived at by reference to a sale of those materials in the open market between buyer and seller independent of each other; or
- (b) on a determination in accordance with paragraph (3) that the amount taken as the price paid on a purchase of those materials at the relevant time was not paid on such a sale thereof as aforesaid, for the value so attributed or, as the case may be, the amount so taken on a purchase,

there shall be substituted the amount which, in the opinion of the Comptroller, would have been paid on a sale of those materials at the relevant time in the open market between buyer and seller independent of each other.

(5) For the purposes of this regulation the value or export price of materials may be adjusted to correspond with the amount which would have been obtained on a sale in the open market between buyer and seller independent of each other and this amount shall also be taken to be the export price when the goods are not the subject of a sale.

8. Except in those cases provided for under section 234 of the Ordinance where goods are to be treated separately from their packing, packing of any sort shall be considered as forming a whole with the goods for purposes only of the application of the percentage value-added condition. No part of any packing required for the transport or storage of goods shall be considered as having been imported from outside the Common Market when determining the origin of the goods as a whole. Treatment of packing

9. (1) Each article in a consignment shall be considered separately.

(2) For the purposes of paragraph (1)—

- (a) where the Common External Tariff set out in the Schedules to the Customs (Amendment) Act, 1979 specifies that a group, set or assembly of articles is to be classified within a single heading, such a group, set or assembly shall be treated as one article; Unit of qualification
Act No. 4 of 1979
- (b) tools, parts and accessories which are imported with an article, and the price of which is included in that of the article or for which

no separate charge is made, shall be considered as forming a whole with the article, where they constitute the standard equipment customarily included on the sale of articles of that kind;

- (c) in cases which are not contemplated by subparagraphs (a) and (b) the goods shall be treated as a single article if they are so treated for purposes of assessing customs duties by the Comptroller.

(3) An unassembled or disassembled article which is imported in more than one consignment because it is not feasible for transport or production reasons to import it in a single consignment, shall where the importer so requests, be treated by the Comptroller as one article.

Segregation of materials

10. (1) Where it would be impracticable for a producer physically to segregate materials of similar character but different origin used in the production of goods, such segregation may be replaced by an appropriate accounting system, which ensures that no more goods received Common Market tariff treatment than would be the case if the producer had been able physically to segregate the materials.

(2) The accounting system referred to in paragraph (1) shall conform to such conditions as may be agreed upon by the Comptroller in order to ensure the application of adequate control measures.

Application of the safeguard mechanism

11. Where a manufacturer of goods for which the qualifying condition for eligibility for a Common Market rate of duty is "wholly produced" or "produced from regional materials" is unable by reason of circumstances beyond his control to obtain supplies of the regional materials required to be used, he shall so inform the Minister who may allow the use of extra-regional materials subject to such conditions as the Minister may impose.

Consignment

12. Goods shall be treated as consigned to Trinidad and Tobago from a Member State if they are shown to the satisfaction of the Comptroller to have been consigned direct to Trinidad and Tobago from a place in the Common Market outside Trinidad and Tobago and the application to such consignment of any rate of duty imposed under the Preferential Tariff, being a rate expressed to be applicable as mentioned in section 128 of the Ordinance, shall not be deemed to be contrary to section 11(1)(a)(i) of the Ordinance by reason only that such place is not a port.

Natural produce of the sea

13. (1) In determining for the purposes of these Regulations where natural produce of the sea or goods produced or manufactured therefrom at sea, are to be treated as produced or manufactured, anything done by or on board of a vessel of a Member State, shall be treated as done in that Member State and any such produce of the sea or goods produced or manufactured therefrom at sea, if brought direct to Trinidad and Tobago are to be deemed to be consigned from that Member State.

(2) For the purposes of this regulation and paragraph (4)(f) of regulation 4, a vessel shall be treated as a vessel of a Member State only if—

- (a) it is registered in a Member State;
- (b) it carries a complement (inclusive of the master thereof) of which not less than three-fourths are nationals of Member States; and
- (c) it is owned and operated by—
 - (i) nationals of Member States;
 - (ii) a government of a Member State; or
 - (iii) a statutory corporation of a Member State.

(3) For the purposes of this regulation, a person shall be regarded as a national of a Member State if he—

- (a) is a citizen of that State;
- (b) has a connection with that State of a kind which entitles him to be regarded as belonging to, or, if so expressed, as being a native or resident of that State for the purpose of the laws relating to immigration as are for the time being in force in that State; or
- (c) is a company or other legal person constituted under the laws of that State which is substantially owned and effectively controlled by persons described in paragraphs (a) and (b), such company or other legal person being engaged in substantial business activity within the Common Market.

14. (1) Where any question arises whether goods imported into Trinidad and Tobago are to be treated as being eligible for a Common Market rate of duty, the Comptroller may require the importer of the goods to furnish him, in such form as he may require, proof of any statement made to him as to any fact necessary to determining that question, and if such proof is not furnished to his satisfaction, the question may be determined without regard to that statement.

Proof of
Importers'
statement

(2) Where the evidence of origin produced by the importer is inadequate, the Comptroller shall, except where the goods are subject to import restrictions or prohibitions, allow delivery of the goods to the importer on condition that he puts up security for any duty or other charge which may be payable.

(3) Where because of the inadequacy of the evidence furnished the Comptroller requires further evidence to be produced, persons in another Member State concerned in the transaction may furnish that evidence to a governmental authority or authorised body designated by that State as the appropriate authority to verify that evidence and the evidence shall be accordingly verified by that authority and transmitted to the Comptroller.

15. The Customs (Caribbean Common Market) (Origin of Goods) Regulations, 1977 are revoked.

TREATMENT OF MIXTURES

1. In the case of mixtures, a Member State may refuse to accept as being of Common Market origin any product resulting from the mixing together of goods which would qualify as being of Common Market origin with goods which would not so qualify, if the characteristics of the products as a whole are not essentially different from the characteristics of the goods which have been mixed.

2. In the case of particular products where it is however recognised by Member States concerned to be desirable to permit mixing of the kind described in the foregoing paragraph, such products shall be accepted as of Common Market origin in respect of such part thereof as may be shown to correspond to the quantity of goods of Common Market origin used in the mixing, subject to such conditions as may be agreed upon.
