All goods deposited in any warehouse without payment of duty on the first importation thereof, or which may be imported or exported, and shall not have been entered for use within Trinidad and Tobago, or for exportation, as the case may be, shall, upon being entered for use within Trinidad and Tobago or for exportation, as the case may be, be subject to such duties as may be due and payable on the like sort of goods under the Customs laws in force at the time when the same are entered, save in cases where special provision shall be made to the contrary.

Effect of obligation to pay duty. [34 of 1996]

20. (1) Where by entry, bond, removal of goods, or otherwise, any obligation has been incurred for the payment of duties of Customs, such obligations shall be deemed to be an obligation to pay all duties of Customs which may become legally payable, or which are made payable or recoverable under the Customs laws, and to pay the same as the same become payable.

(2) When any duty has been short levied or erroneously refunded, the person who should have paid the amount short levied or to whom the refund has erroneously been made, shall pay the amount short levied, or repay the amount erroneously refunded, on demand being made by the Comptroller.

(3) Where the value has been adjusted upon a discovery under section 23(2A), the Comptroller may demand the additional duty payable or may refund the duty overpaid based upon the new value.

Duty on goods re-imported.

21. Where any goods whether made or produced within Trinidad and Tobago or not, being of a class or description liable to any import duty of Customs, are re-imported into and entered for use within Trinidad and Tobago after exportation therefrom, and it is shown to the satisfaction of the Comptroller that any duty of Customs or Excise chargeable in respect of the goods prior to their exportation was duly paid, either prior to the exportation or

(b) if the goods at the time when the same are entered for use within Trinidad and Tobago after re-importation are of a class or description liable to an import duty *ad valorem*, and it is further shown as aforesaid that the goods have been subjected to a process of repair, renovation or improvement abroad, but that their form or character has not been changed, such goods shall be chargeable with duty as if the amount of the increase in the value of the goods attributable to the process were the whole value thereof and, where any sum has been contracted to be paid for the execution of the process, the sum shall be *prima facie* evidence of that amount, but without prejudice to the powers of the Comptroller under the Customs laws as to the ascertainment of the value of the

goods for the purpose of assessing duty thereon *ad valorem*; but if the rate of duty of Excise or Customs, as the case may be, chargeable on goods of the same class or description at the time when the same are entered for use within Trinidad and Tobago after re-importation shall exceed the rate paid on the said goods as a duty of Excise or on first importation and entry, as the case may be, then in such case, in addition to the *ad valorem* import duty chargeable hereunder according to the amount of the increase in the value of the goods attributable to the process, such goods shall be chargeable with additional Excise or Customs duty calculated in the manner set out in paragraph *(a)*, as if such goods had not been subjected to any process of repair, renovation or improvement abroad.

Procedure in case of deposit.

(2) All deposits shall be paid by the Comptroller into the Treasury and, in case no proceedings are brought within the time limited for that purpose, the deposit shall be retained and applied to the use of the State in the same manner as if it had been originally paid and received as the duty due on the goods; and in case of proceedings, if it is determined that the duty deposited is not the proper duty, but that a less duty is payable, the difference between the deposit and the duty found to be due, or the whole deposit, as the case may require, shall be returned to such importer or exporter.

(3) Proceedings referred to in this section shall be commenced before the Appeal Board.

Ch. 4:50.

Unsatisfactory evidence of value of goods. [34 of 1996].

87A. (1) Where the Comptroller considers that he is unable to make a proper assessment of the value of goods to be entered on account of the failure of the importer to produce satisfactory documentary evidence of the value of the goods, he may direct that—

(a) the goods be examined and a provisional assessment be made by the proper Officer of the duty payable on the goods; and

(b) the goods be provisionally entered based on the payment of the amount of duty calculated by the importer, such amount being brought to account as revenue.

(2) Pending entry of the goods an importer shall, in addition to the amount of the provisional assessment referred to in subsection (1)*(b)* pay as a deposit to the Comptroller, an amount equal to the difference between the duty provisionally assessed by the proper Officer referred to in subsection (1)*(a)* and the duty calculated by the importer referred to in subsection (1)*(b)*.

(3) The importer may, with the approval of the Comptroller, secure the deposit payable under subsection (2) by means of a bond.

(a) the documents or other information required under subsection (4) have not been produced within the time specified in that subsection; or

(b) the importer informs the Comptroller in writing before the expiry of the time specified in subsection (4) that he is unable to produce any further documents or information,

the amount of duty which was provisionally assessed under subsection (1) shall be treated as the final assessment and the deposit paid shall, unless the importer commences proceedings under section 22 within six months of the date of the final assessment, be brought to account as revenue within that latter period.

(6) Notwithstanding section 22(1), where an importer fails to produce the required documents or other information pursuant to subsection (4)—

(a) the Comptroller shall notify the importer of that final assessment within two weeks of the date of such assessment;

(b) no dispute shall be considered to have arisen until such time as the final assessment is made under subsection (4).

(7) Where—

(a) the additional documents or other information required under subsection (4), have been provided to the satisfaction of the Comptroller; and

(a) pursuant to section 87A(4), an importer submits documents or other information to the Comptroller relating to the goods imported by him; and

(b) the Comptroller knows or has reason to believe that such documents or other information are false in any material particular affecting the valuation of the goods,

the Comptroller shall inform the importer that he is not satisfied with the documents or other information produced and may request the importer to submit further documents or information within such period as the Comptroller may direct.

(2) Where the goods to be entered are not prohibited or restricted, the Comptroller may allow provisional entry of such goods on the payment of a deposit equal to the duty assessed by the Comptroller together with an additional amount, not being more than one-half of the duty assessed.

(3) The additional amount paid pursuant to subsection (2) shall be refunded to the importer unless the Comptroller commences proceedings in Court within one month of the date of provisional entry of the goods.

(4) The duty based on the calculation by the importer shall be accepted by the Comptroller unless the Comptroller commences proceedings in Court within three months of the date of provisional entry of the goods.

(5) The deposit together with the additional amount paid pursuant to subsection (2) shall, in addition to any penalty which the Court may impose, be forfeited where the Court finds that the importer has committed an offence under section 213*(e)*.

(6) Where the Comptroller has commenced proceedings in Court, no dispute shall be considered to have arisen for the purposes of section 22 (1) until the Court proceedings have been concluded.

(7) After the goods are provisionally entered and before delivery from the port of importation, the Comptroller may, where he considers it necessary, cause the goods to be photographed in a manner so as to show—

(a) the method of packaging;

(b) the contents of a representative sample of all the packages;

Goods so deposited shall be subject to rent and other charges as if they were goods warehoused in a State warehouse in pursuance of an entry for warehousing.

Goods warehoused may be sold.

95. (1) Where under this Act any goods are required to be deposited in a State warehouse, and the goods are of a perishable

nature, the Comptroller may, notwithstanding such provisions, sell the same forthwith by public auction; and if the goods, though not perishable, are of a kind not permitted by any other provision of law to be deposited in a State warehouse, the Comptroller may, notwithstanding such provisions, sell the goods by public auction after fourteen days' notice by publication in the *Gazette*.

GENERAL RULES FOR THE INTERPRETATION OF THE HARMONISED SYSTEM

Classification of goods in the Nomenclature shall be governed by the following principles:

1. The titles of Sections, Chapters and sub-Chapters are provided for ease of reference only; for legal purposes, classification shall be determined according to the terms of the headings and any relative Section or Chapter Notes and, provided such headings or Notes do not otherwise require, according to the following provisions:

2. *(a)* Any reference in a heading to an article shall be taken to include a reference to that article incomplete or unfinished, provided that, as presented, the incomplete or unfinished article has the essential character of the complete or finished article. It shall also be taken to include a reference to that article complete or finished (or falling to be classified as complete or finished by virtue of this Rule), presented unassembled or disassembled.

(b) Any reference in a heading to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances. Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance. The classification of goods consisting of more than one material or substance shall be according to the principles of Rule 3.

3. When by application of Rule 2*(b)* or for any other reason, goods are, *prima facie*, classifiable under two or more headings, classification shall be effected as follows:

(a) The heading which provides the most specific description shall be preferred to headings providing a more general description. However, when two or more headings each refer to part only of the materials or substances contained

in mixed or composite goods or to part only of the items in a set put up for retail sale, those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods.

(b) Mixtures, composite goods consisting of different materials or made up of different components, and goods put up in sets for retail sale, which cannot be classified by reference to 3*(a)*, shall be classified as if they consisted of the material or component which gives them their essential character, insofar as this criterion is applicable.

(c) When goods cannot be classified by reference to 3*(a)* or 3*(b)*, they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration.

4. Goods which cannot be classified in accordance with the above Rules shall be classified under the heading appropriate to the goods to which they are most akin.

5. In addition to the foregoing provisions, the following Rules shall apply in respect of the goods referred to therein:

(a) Camera cases, musical instrument cases, gun cases, drawing instrument cases, necklace cases and similar containers, specially shaped or fitted to contain a specific article or set of articles, suitable for long-term use and presented with the articles for which they are intended, shall be classified with such articles when of a kind normally sold therewith. This Rule does not, however, apply to containers which give the whole its essential character;

(b) Subject to the provisions of Rule 5*(a)* above, packing materials and packing containers presented with the goods therein shall be classified with the goods if they are of a kind normally used for packing such goods. However, this provision is not binding when such packing materials or packing containers are clearly suitable for repetitive use.

6. For legal purposes, the classification of goods in the subheadings of a heading shall be determined according to the terms of those subheadings and any related Subheading Notes and, *mutatis mutandis*, to the above Rules, on the understanding that only subheadings at the same level are comparable. For the purposes of this Rule the relative Section and Chapter Notes also apply, unless the context otherwise requires.

CHAPTER 4

DAIRY PRODUCE; BIRDS' EGGS; NATURAL HONEY; EDIBLE PRODUCTS OF ANIMAL ORIGIN, NOT ELSEWHERE SPECIFIED OR INCLUDED

Notes.

1. The expression "milk" means full cream milk or partially or completely skimmed milk.

2. For the purposes of heading 04.05:

   (a) The term "butter" means natural butter, whey butter or recombined butter (fresh, salted or rancid, including canned butter) derived exclusively from milk, with a milkfat content of 80% or more but not more than 95% by weight, a maximum milk solids-not-fat content of 2% by weight and a maximum water content of 16% by weight. Butter does not contain added emulsifiers, but may contain sodium chloride, food colours, neutralising salts and cultures of harmless lactic-acid-producing bacteria.

   (b) The expression "dairy spreads" means a spreadable emulsion of the water-in-oil type, containing milkfat as the only fat in the product, with a milkfat content of 39% or more but less than 80% by weight.

3. Products obtained by the concentration of whey and with the addition of milk or milkfat are to be classified as cheese in heading 04.06 provided that they have the three following characteristics:

   (a) a milkfat content, by weight of the dry matter, of 5% or more;

   (b) a dry matter content, by weight, of at least 70% but not exceeding 85%; and

   (c) they are moulded or capable of being moulded.

4. This Chapter does not cover:

   (a) Products obtained from whey, containing by weight more than 95% lactose, expressed as anhydrous lactose calculated on the dry matter (heading 17.02); or

   (b) Albumins (including concentrates of two or more whey proteins, containing by weight more than 80% whey proteins, calculated on the dry matter) (heading 35.02) or globulins (heading 3504.00.00).

Subheading Notes.

1. For the purposes of subheading 0404.10.00, the expression "modified whey" means products consisting of whey constituents, that is , whey from which all or part of the lactose, proteins or minerals have been removed, whey to which natural whey constituents have been added, and products obtained by mixing natural whey constituents.

2. For the purposes of subheading 0405.10.00 the term "butter" does not include dehydrated butter or ghee (subheading 0405.90.00).

In this Section the term "pellets" means products which have been agglomerated either directly by compression or by the addition of a binder in a proportion not exceeding 3% by weight.

CHAPTER 16

PREPARATIONS OF MEAT, OF FISH OR OF CRUSTACEANS, MOLLUSCS OR OTHER AQUATIC INVERTEBRATES

Notes.

1. This Chapter does not cover meat, meat offal, fish, crustaceans, molluscs or other aquatic invertebrates, prepared or preserved by the processes specified in Chapter 2 or 3 or heading 0504.00.00 .

2. Food preparations fall in this Chapter provided that they contain more than 20% by weight of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof. In cases where the preparation contains two or more of the products mentioned above, it is classified in the heading of Chapter l6 corresponding to the component or components which predominate by weight. These provisions do not apply to the stuffed products of heading 19.02 or to the preparations of heading 21.03 or 21.04.

Subheading Notes.

1. For the purposes of subheading 1602.10.00, the expression "homogenised preparations" means preparations of meat, meat offal or blood, finely homogenised, put up for retail sale as infant food or for dietetic purposes, in containers of a net weight content not exceeding 250 g. For the application of this definition no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. These preparations may contain a small quantity of visible pieces of meat or meat offal. This subheading takes precedence over all other subheadings of heading 16.02.

2. The fish and crustaceans specified in the subheadings of heading 16.04 or 16.05 under their common names only, are of the same species as those mentioned in Chapter 3 under the same name.

Notes.

1. Except where their context or Note 4 to this Chapter otherwise requires, the headings of this Chapter cover only products which are in the crude state or which have been washed (even with chemical substances eliminating the impurities without changing the structure of the product), crushed, ground, powdered, levigated, sifted, screened, concentrated by flotation, magnetic separation or other mechanical or physical processes (except crystallisation), but not products which have been roasted, calcined, obtained by mixing or subjected to processing beyond that mentioned in each heading.

   The products of this Chapter may contain an added anti-dusting agent, provided that such addition does not render the product particularly suitable for specific use rather than for general use.

2. This Chapter does not cover:

   (a) Sublimed sulphur, precipitated sulphur or colloidal sulphur (heading 2802.00.00);

   (b) Earth colours containing 70% or more by weight of combined iron evaluated as $Fe_2 0_3$ (heading 28.21);

   (c) Medicaments or other products of Chapter 30;

   (d) Perfumery, cosmetic or toilet preparations (Chapter 33);

   (e) Setts, curbstones or flagstones (heading 6801.00.00); mosaic cubes or the like (heading 68.02); roofing, facing or damp course slates (heading 6803.00);

MINERAL FUELS, MINERAL OILS AND PRODUCTS OF THEIR DISTILLATION; BITUMINOUS SUBSTANCES; MINERAL WAXES

Notes.

1. This Chapter does not cover:

   (a) Separate chemically defined organic compounds, other than pure methane and propane which are to be classified in heading 27.11;

   (b) Medicaments of heading 30.03 or 30.04; or

   (c) Mixed unsaturated hydrocarbons of heading 33.01, 33.02 or 38.05.

2. References in heading 27.10 to "petroleum oils and oils obtained from bituminous minerals" include not only petroleum oils and oils obtained from bituminous minerals but also similar oils, as well as those consisting mainly of mixed unsaturated hydrocarbons, obtained by any process, provided that the weight of the non-aromatic constituents exceeds that of the aromatic constituents.

   However, the references do not include liquid synthetic polyolefins of which less than 60% by volume distils at 300°C, after conversion to 1,013 millibars when a reduced-pressure distillation method is used (Chapter 39).

3. For the purposes of heading 27.10, “waste oils” means waste containing mainly petroleum oil and oils obtained from bituminous minerals (as described in Note 2 to this Chapter), whether or not mixed with water. These include:

   (a) Such oils no longer fit for use as primary products (for example, used lubricating oils, used hydraulic oils and used transformer oils);

   (b) Sludge oils from the storage tanks of petroleum oils, mainly containing such oils and a high concentration of additives (for example, chemicals) used in the manufacture of the primary products; and

   (c) Such oils in the form of emulsions in water or mixtures with water, such as those resulting from oil spills, storage tank washings, or from the use of cutting oils for machining operations.

Subheading Notes.

1. For the purposes of subheading 2701.11.00, "anthracite" means coal having a volatile matter limit (on a dry, mineral-matter-free basis) not exceeding 14%.

2. For the purposes of subheading 2701.12.00, "bituminous coal" means coal having a volatile matter limit (on a dry, mineral-matter-free basis) exceeding 14% and a calorific value limit (on a moist, mineral-matter-free basis) equal to or greater than 5,833 kcal/kg.

3. For the purposes of subheadings 2707.10.00, 2707.20.00, 2707.30.00 and 2707.40.00 the terms"benzol (benzene)", "toluol (toluene)", "xylol (xylenes)", "naphthalene" apply to products which contain more than 50% by weight of benzene, toluene, xylenes or naphthalene, respectively.

4. For the purposes of subheadings 2710.11.00, “light oils and preparations” are those of which 90% or more by volume (including losses) distil at 210°C (ASTM D86 method).

3. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this Section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the heading appropriate to that product, provided that the constituents are:

   (a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;

   (b) presented together; and

   (c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.

CHAPTER 28

INORGANIC CHEMICALS; ORGANIC OR INORGANIC COMPOUNDS OF PRECIOUS METALS, OF RARE-EARTH METALS, OF RADIOACTIVE ELEMENTS OR OF ISOTOPES

Notes.

1. Except where the context otherwise requires, the headings of this Chapter apply only to:

   (a) Separate chemical elements and separate chemically defined compounds, whether or not containing impurities;

   (b) The products mentioned in (a) above dissolved in water;

   (c) The products mentioned in (a) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for specific use rather than for general use;

   (d) The products mentioned in (a), (b) or (c) above with an added stabiliser (including an anti-caking agent) necessary for their preservation or transport;

   (e) The products mentioned in (a), (b), (c) or (d) above with an added anti-dusting agent or a colouring substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use rather than for general use.

2. In addition to dithionites and sulphoxylates, stabilised with organic substances (heading 28.31), carbonates and peroxocarbonates of inorganic bases (heading 28.36), cyanides, cyanide oxides and complex cyanides of inorganic bases (heading 28.37), fulminates, cyanates and thiocyanates, of inorganic bases (heading 28.42), organic products included in headings 28.43 to 28.46 and 2852.00.00 and carbides (heading 28.49), only the following compounds of carbon are to be classified in this Chapter:

(e) Spent (irradiated) fuel elements (cartridges) of nuclear reactors;

(f) Radioactive residues whether or not usable.

The term "isotopes", for the purposes of this Note and of the wording of headings 28.44 and 28.45, refers to:

(i) individual nuclides, excluding, however, those existing in nature in the monoisotopic state;

(ii) mixtures of isotopes of one and the same element, enriched in one or several of the said isotopes, that is, elements of which the natural isotopic composition has been artificially modified.

CHAPTER 29

ORGANIC CHEMICALS

Notes.

1. Except where the context otherwise requires, the headings of this Chapter apply only to:

   (a) Separate chemically defined organic compounds, whether or not containing impurities;

   (b) Mixtures of two or more isomers of the same organic compound (whether or not containing impurities), except mixtures of acyclic hydrocarbon isomers (other than stereoisomers), whether or not saturated (Chapter 27);

   (c) The products of headings 29.36 to 29.39 or the sugar ethers, sugar acetals and sugar esters, and their salts, of heading 2940.00.00, or the products of heading 29.41, whether or not chemically defined;

   (d) The products mentioned in (a), (b) or (c) above dissolved in water;

   (e) The products mentioned in (a), (b) or (c) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for specific use rather than for general use;

   (f) The products mentioned in (a), (b), (c), (d) or (e) above with an added stabiliser (including an anti-caking agent) necessary for their preservation or transport;

   (g) The products mentioned in (a), (b), (c), (d), (e) or (f) above with an added anti-dusting agent or a colouring or odoriferous substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use rather than for general use;

   (h) The following products, diluted to standard strengths, for the production of azo dyes: diazonium salts, couplers used for these salts and diazotisable amines and their salts.

2. This Chapter does not cover:

   (a) Goods of heading 15.04 or crude glycerol of heading 1520.00.00;

CHAPTER 29—*Continued*

ORGANIC CHEMICALS—*Continued*

(b) Ethyl alcohol (heading 22.07 or 22.08);

(c) Methane or propane (heading 27.11);

(d) The compounds of carbon mentioned in Note 2 to Chapter 28;

(e) Urea (heading 31.02 or 31.05);

(f) Colouring matter of vegetable or animal origin (heading 3203.00), synthetic organic colouring matter, synthetic organic products of a kind used as fluorescent brightening agents or as luminophores (heading 32.04) or dyes or other colouring matter put up in forms or packings for retail sale (heading 32.12);

(g) Enzymes (heading 35.07);

(h) Metaldehyde, hexamethylenetetramine or similar substances, put up in forms (for example, tablets, sticks or similar forms) for use as fuels, or liquid or liquefied-gas fuels in containers of a kind used for filling or refilling cigarette or similar lighters and of a capacity not exceeding 300 cm^3 (heading 36.06);

(ij) Products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades, of heading 3813.00.00; ink removers put up in packings for retail sale, of heading 38.24; or

(k) Optical elements, for example, of ethylenediamine tartrate (heading 90.01).

3. Goods which could be included in two or more of the headings of this Chapter are to be classified in that one of those headings which occurs last in numerical order.

4. In headings 29.04 to 29.06, 29.08 to 2911.00.00 and 2913.00.00 to 29.20, any reference to halogenated, sulphonated, nitrated or nitrosated derivatives includes a reference to compound derivatives, such as sulphohalogenated, nitrohalogenated, nitrosulphonated or nitrosulphohalogenated derivatives.

Nitro or nitroso groups are not to be taken as "nitrogen-functions" for the purposes of heading 29.29.

For the purposes of headings 2911.00.00, 29.12, 29.14, 29.18 and 29.22, "oxygen-function" is to be restricted to the functions (the characteristic organic oxygen-containing groups) referred to in headings 29.05 to 29.20.

5. (A) The esters of acid-function organic compounds of sub-Chapters 1 to VII with organic compounds of these sub-Chapters are to be classified with that compound which is classified in the heading which occurs last in numerical order in these sub-Chapters.

(B) Esters of ethyl alcohol or glycerol with acid-function organic compounds of sub-Chapters I to VII are to be classified in the same heading as the corresponding acid-function compounds.

(C) Subject to Note 1 to Section VI and Note 2 to Chapter 28:

(1) Inorganic salts of organic compounds such as acid-, phenol- or enol-function compounds or organic bases, of sub-Chapters I to X or heading 2942.00.00, are to be classified in the heading appropriate to the organic compound;

(2) Salts formed between organic compounds of sub- Chapters I to X or heading 2942.00.00 are to be classified in the heading appropriate to the base or to the acid (including phenol- or enol-function compounds) from which they are formed, whichever occurs last in numerical order in the Chapter; and

(3) Co-ordination compounds, other than products classifiable in sub-Chapter XI or heading 29.41, are to be classified in the heading which occurs last in numerical order in Chapter 29, among those appropriate to the fragments formed by "cleaving" of all metal bonds, other than metal-carbon bonds.

(D) Metal alcoholates are to be classified in the same heading as the corresponding alcohols except in the case of ethanol (heading 29.05).

(E) Halides of carboxylic acids are to be classified in the same heading as the corresponding acids.

6. The compounds of headings 29.30 and 2931.00.00 are organic compounds the molecules of which contain, in addition to atoms of hydrogen, oxygen or nitrogen, atoms of other non-metals or of metals (such as sulphur, arsenic or lead) directly linked to carbon atoms.

Heading 29.30 (organo-sulphur compounds) and heading 2931.00.00 (other organo-inorganic compounds) do not include sulphonated or halogenated derivatives (including compound derivatives) which, apart from hydrogen, oxygen and nitrogen, only have directly linked to carbon the atoms of sulphur or of a halogen which give them their nature of sulphonated or halogenated derivatives (or compound derivatives).

7. Headings 29.32, 29.33 and 29.34 do not include epoxides with a three-membered ring, ketone peroxides, cyclic polymers of aldehydes or of thioaldehydes, anhydrides of polybasic carboxylic acids, cyclic esters of polyhydric alcohols or phenols with polybasic acids, or imides of polybasic acids.

These provisions apply only when the ring-position hetero-atoms are those resulting solely from the cyclising function or functions here listed.

CHAPTER 29—*Continued*

ORGANIC CHEMICALS—*Continued*

8. For the purposes of heading 29.37:

(a) the term "hormones" includes hormone-releasing or hormone-stimulating factors, hormone inhibitors and hormone antagonists (anti-hormones);

(b) the expression "used primarily as hormones" applies not only to hormone derivatives and structural analogues used primarily for their hormonal effect, but also to those derivatives and structural analogues used primarily as intermediates in the synthesis of products of this heading.

Subheading Notes.

1. Within any one heading of this Chapter, derivatives of a chemical compound (or group of chemical compounds) are to be classified in the same subheading as that compound (or group of compounds) provided that they are not more specifically covered by any other subheading and that there is no residual subheading named "Other" in the series of subheadings concerned.

2. Note 3 to Chapter 29 does not apply to the subheadings of this Chapter.

3. Headings 3203.00, 32.04, 3205.00.00 and 32.06 apply also to preparations based on colouring matter (including, in the case of heading 32.06, colouring pigments of heading 25.30 or Chapter 28, metal flakes and metal powders), of a kind used for colouring any material or used as ingredients in the manufacture of colouring preparations. The headings do not apply, however, to pigments dispersed in non-aqueous media, in liquid or paste form, of a kind used in the manufacture of paints, including enamels (heading 32.12), or to other preparations of heading 32.07, 32.08, 32.09, 3210.00, 32.12, 32.13 or 32.15.

4. Heading 32.08 includes solutions (other than collodions) consisting of any of the products specified in headings 39.01 to 39.13 in volatile organic solvents when the weight of the solvent exceeds 50% of the weight of the solution.

5. The expression "colouring matter" in this Chapter does not include products of a kind used as extenders in oil paints, whether or not they are also suitable for colouring distempers.

6. The expression "stamping foils" in heading 32.12 applies only to thin sheets of a kind used for printing, for example, book covers or hat bands, and consisting of:

CHAPTER 38

MISCELLANEOUS CHEMICAL PRODUCTS

Notes.

1. This Chapter does not cover:

   (a) Separate chemically defined elements or compounds with the exception of the following:

      (1) Artificial graphite (heading 38.01);

      (2) Insecticides, rodenticides, fungicides, herbicides, anti-sprouting products and plant-growth regulators, disinfectants and similar products, put up as described in heading 38.08;

      (3) Products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades (heading 3813.00.00);

      (4) Certified reference materials specified in Note 2 below;

      (5) Products specified in Note 3 (a) or 3 (c) below;

   (b) Mixtures of chemicals with foodstuffs or other substances with nutritive value, of a kind used in the preparation of human foodstuffs (generally heading 21.06);

   (c) Slag, ash and residues (including sludges, other than sewage sludge), containing metals, arsenic or their mixtures and meeting the requirements of Note 3 (a) or 3 (b) to Chapter 26 (heading 26.20);

   (d) Medicaments (heading 30.03 or 30.04); or

   (e) Spent catalysts of a kind used for the extraction of base metals or for the manufacture of chemical compounds of base metals (heading 26.20), spent catalysts of a kind used principally for the recovery of precious metal (heading 71.12) or catalysts consisting of metals or metal alloys in the form of, for example, finely divided powder or woven gauze (Section XIV or XV).

2. (A) For the purpose of heading 3822.00.00, the expression "certified reference materials" means reference materials which are accompanied by a certificate which indicates the values of the certified properties, the methods used to determine these values and the degree of certainty associated with each value and which are suitable for analytical, calibrating or referencing purposes.

(B) With the exception of the products of Chapter 28 or 29, for the classification of certified reference materials, heading 3822.00.00 shall take precedence over any other heading in the Nomenclature.

3. Heading 38.24 includes the following goods which are not to be classified in any other heading of the Nomenclature:

(a) Cultured crystals (other than optical elements) weighing not less than 2.5 g each, of magnesium oxide or of the halides of the alkali or alkaline-earth metals;

(b) Fusel oil; Dippel's oil;

(c) Ink removers put up in packings for retail sale;

(d) Stencil correctors and other correcting fluids put up in packings for retail sale; and

(e) Ceramic firing testers, fusible (for example, Seger cones).

4. Throughout the Nomenclature, "municipal waste" means waste of a kind collected from households, hotels, restaurants, hospitals, shops, offices, etc., road and pavement sweepings, as well as construction and demolition waste. Municipal waste generally contains a large variety of materials such as plastics, rubber, wood, paper, textiles, glass, metals, food materials, broken furniture and other damaged or discarded articles. The term "municipal waste", however, does not cover:

(a) Individual materials or articles segregated from the waste, such as wastes of plastics, rubber, wood, paper, textiles, glass or metals and spent batteries which fall in their appropriate headings of the Nomenclature;

(b) Industrial waste ;

(c) Waste pharmaceuticals, as defined in Note 4 (k) to Chapter 30; or

(d) Clinical waste, as defined in Note 6 (a) below.

5. For the purposes of heading 38.25, "sewage sludge" means sludge arising from urban effluent treatment plant and includes pre-treatment waste, scourings and unstabilised sludge. Stabilised sludge when suitable for use as fertilizer is excluded (Chapter 31).

6. For the purposes of heading 38.25, the expression "other wastes" applies to:

(a) Clinical waste, that is, contaminated waste arising from medical research, diagnosis, treatment or other medical, surgical, dental or veterinary procedures, which often contain

CHAPTER 38—*Continued*

MISCELLANEOUS CHEMICAL PRODUCTS—*Continued*

pathogens and pharmaceutical substances and require special disposal procedures (for example, soiled dressings, used gloves and used syringes);

(b) Waste organic solvents;

(c) Wastes of metal pickling liquors, hydraulic fluids, brake fluids and anti-freezing fluids; and

(d) Other wastes from chemical or allied industries.

The expression "other wastes" does not, however, cover wastes which contain mainly petroleum oils or oils obtained from bituminous minerals (heading 27.10).

Subheading Notes.

1. Subheading 3808.50.00 covers only goods of heading 38.08, containing one or more of the following substances : aldrin (ISO); binapacryl (ISO); camphechlor (ISO) (toxaphene); captafol (ISO); chlordane (ISO); chlorodimeform (ISO); chlorobenzilate (ISO); DDT (ISO) (clofenotane (INN), 1,1,1-trichloro-2,2-bis(p-chlorophenyl)ethane); dieldrin (ISO, INN); dinoseb (ISO), its salts or its esters; ethylene dibromide (ISO) (1,2-dibromoethane); ethylene dichloride (ISO) (1,2-dichloroethane); fluoroacetamide (ISO); heptachlor (ISO); hexachlorobenzene (ISO); 1,2,3,4,5,6-hexachlorocyclohexane (HCH (ISO)), including lindane (ISO, INN); mercury compounds; methamidophos (ISO); monocrotophos (ISO); oxirane (ethylene oxide); parathion (ISO); parathion-methyl (ISO) (methyl-parathion); pentachlorophenol (ISO); phosphamidon (ISO); 2,4,5-T (ISO) (2,4,5-trichlorophenoxyacetic acid), its salts or its esters.

2. For the purposes of subheadings 3825.41.00 and 3825.49.00, "waste organic solvents" are wastes containing mainly organic solvents, not fit for further use as presented as primary products, whether or not intended for recovery of the solvents.

SECTION II

PLASTICS AND ARTICLES THEREOF; RUBBER AND ARTICLES THEREOF

Notes.

1. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this Section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the heading appropriate to that product, provided that the constituents are:

   (a) having regard to the manner in which they are put up, clearly indentifiable as being intended to be used together without first being repacked;

   (b) presented together; and

   (c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.

2. Except for the goods of heading 39.18 or 39.19, plastics, rubber, and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in Chapter 49.

CHAPTER 39

PLASTICS AND ARTICLES THEREOF

Notes.

1. Throughout the Nomenclature the expression "plastics" means those materials of headings 39.01 to 3914.00.00 which are or have been capable, either at the moment of polymerisation or at some subsequent stage, of being formed under external influence (usually heat and pressure, if necessary with a solvent or plasticiser) by moulding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence.

   Throughout the Nomenclature any reference to "plastics" also includes vulcanised fibre. The expression, however, does not apply to materials regarded as textile materials of Section XI.

2. This Chapter does not cover:

   (a) Lubricating preparations of heading 27.10 or 34.03;

   (b) Waxes of heading 27.12 or 34.04;

   (c) Separate chemically defined organic compounds (Chapter 29);

   (d) Heparin or its salts (heading 30.01);

   (e) Solutions (other than collodions) consisting of any of the products specified in headings 39.01 to 39.13 in volatile organic solvents when the weight of the solvent exceeds 50% of the weight of the solution (heading 32.08); stamping foils of heading 32.12;

   (f) Organic surface-active agents or preparations of heading 34.02;

   (g) Run gums or ester gums (heading 38.06);

   (h) Prepared additives for mineral oils (including gasoline) or for other liquids used for the same purposes as mineral oils (heading 38.11);

   (ij) Prepared hydraulic fluids based on polyglycols, silicones or other polymers of Chapter 39 (heading 3819.00.00);

   (k) Diagnostic or laboratory reagents on a backing of plastics (heading 3822.00.00);

   (l) Synthetic rubber, as defined for the purposes of Chapter 40, or articles thereof;

(m) Saddlery or harness (heading 4201.00.00) or trunks, suitcases, handbags or other containers of heading 42.02;

(n) Plaits, wickerwork or other articles of Chapter 46;

(o) Wall coverings of heading 48.14;

(p) Goods of Section XI (textiles and textile articles);

(q) Articles of Section XII (for example, footwear, headgear, umbrellas, sun umbrellas, walking-sticks, whips, riding-crops or parts thereof);

(r) Imitation jewellery of heading 71.17;

(s) Articles of Section XVI (machines and mechanical or electrical appliances);

(t) Parts of aircraft or vehicles of Section XVII;

(u) Articles of Chapter 90 (for example, optical elements, spectacle frames, drawing instruments);

(v) Articles of Chapter 91 (for example, clock or watch cases);

(w) Articles of Chapter 92 (for example, musical instruments or parts thereof);

(x) Articles of Chapter 94 (for example, furniture, lamps and lighting fittings, illuminated signs, prefabricated buildings);

(y) Articles of Chapter 95 (for example, toys, games, sports requisites); or

(z) Articles of Chapter 96 (for example, brushes, buttons, slide fasteners, combs, mouthpieces or stems for smoking pipes, cigarette-holders or the like, parts of vacuum flasks or the like, pens, propelling pencils).

3. Headings 39.01 to 39.11 apply only to goods of a kind produced by chemical synthesis, falling in the following categories:

(a) Liquid synthetic polyolefins of which less than 60% by volume distils at 300°C, after conversion to 1,013 millibars when a reduced-pressure distillation method is used (headings 39.01 and 39.02);

(b) Resins, not highly polymerised, of the coumarone-indene type (heading 39.11);

(c) Other synthetic polymers with an average of at least 5 monomer units;

CHAPTER 39—*Continued*

PLASTICS AND ARTICLES THEREOF—*Continued*

(d) Silicones (heading 3910.00.00);

(e) Resols (heading 39.09) and other prepolymers.

4. The expression "copolymers" covers all polymers in which no single monomer unit contributes 95% or more by weight to the total polymer content.

For the purposes of this Chapter, except where the context otherwise requires, copolymers (including co-polycondensates, co-polyaddition products, block copolymers and graft copolymers) and polymer blends are to be classified in the heading covering polymers of that comonomer unit which predominates by weight over every other single comonomer unit. For the purposes of this Note, constituent comonomer units of polymers falling in the same heading shall be taken together.

If no single comonomer unit predominates, copolymers or polymer blends, as the case may be, are to be classified in the heading which occurs last in numerical order among those which equally merit consideration.

5. Chemically modified polymers, that is those in which only appendages to the main polymer chain have been changed by chemical reaction, are to be classified in the heading appropriate to the unmodified polymer. This provision does not apply to graft copolymers.

6. In headings 39.01 to 3914.00.00, the expression "primary forms" applies only to the following forms:

(a) Liquids and pastes, including dispersions (emulsions and suspensions) and solutions;

(b) Blocks of irregular shape, lumps, powders (including moulding powders), granules, flakes and similar bulk forms.

7. Heading 39.15 does not apply to waste, parings and scrap of a single thermoplastic material, transformed into primary forms (headings 39.01 to 3914.00.00).

8. For the purposes of heading 39.17, the expression "tubes, pipes and hoses" means hollow products, whether semi-manufactures or finished products, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). This expression also includes sausage casings and other lay-flat tubing. However, except for the last-mentioned, those having an internal cross-section other than round, oval, rectangular (in which the length does not exceed 1.5 times the width) or in the shape of a regular polygon are not to be regarded as tubes, pipes and hoses but as profile shapes.

9. For the purposes of heading 39.18, the expression "wall or ceiling coverings of plastics" applies to products in rolls, of a width not less than 45 cm, suitable for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the layer of plastics (on the face side) being grained, embossed, coloured, design-printed or otherwise decorated.

10. In headings 39.20 and 39.21, the expression "plates, sheets, film, foil and strip" applies only to plates, sheets, film, foil and strip (other than those of Chapter 54) and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but not further worked (even if when so cut they become articles ready for use).

11. Heading 39.25 applies only to the following articles, not being products covered by any of the earlier headings of sub-Chapter II:

(a) Reservoirs, tanks (including septic tanks), vats and similar containers, of a capacity exceeding 300 1;

(b) Structural elements used, for example, in floors, walls or partitions, ceilings or roofs;

(c) Gutters and fittings therefor;

(d) Doors, windows and their frames and thresholds for doors;

(e) Balconies, balustrades, fencing, gates and similar barriers;

(f) Shutters, blinds (including Venetian blinds) and similar articles and parts and fittings thereof;

(g) Large-scale shelving for assembly and permanent installation, for example, in shops, workshops, warehouses;

(h) Ornamental architectural features, for example, flutings, cupolas, dovecotes; and

(ij) Fittings and mountings intended for permanent installation in or on doors, windows, staircases, walls or other parts of buildings, for example, knobs, handles, hooks, brackets, towel rails, switch-plates and other protective plates.

Subheading Notes.

1. Within any one heading of this Chapter, polymers (including copolymers) and chemically modified polymers are to be classified according to the following provisions:

(a) Where there is a subheading named "other" in the same series:

(i) The designation in a subheading of a polymer by the prefix “poly” (for example, polyethylene and polyamide-6.6) means that the constituent monomer unit or monomer units of the named polymer taken together must contribute 95% or more by weight of the total polymer content.

CHAPTER 39—*Continued*

PLASTICS AND ARTICLES THEREOF—*Continued*

(1) The designation in a subheading of a polymer by the prefix "poly" (for example, polyethylene and polyamide-6,6) means that the constituent monomer unit or monomer units of the named polymer taken together must contribute 95% or more by weight of the total polymer content.

(ii) The copolymers named in subheadings 3901.30.00, 3903.20.00, 3903.30.00 and 3904.30.00 are to be classified in those subheadings, provided that the comonomer units of the named copolymers contribute 95% or more by weight of the total polymer content.

(iii) Chemically modified polymers are to be classified in the subheading named "Other," provided that the chemically modified polymers are not more specifically covered by another subheading.

(iv) Polymers not meeting (1), (2) or (3) above, are to be classified in the subheading, among the remaining subheadings in the series, covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series of subheadings under consideration are to be compared.

(b) Where there is no subheading named "Other" in the same series:

(i) Polymers are to be classified in the subheading covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series under consideration are to be compared.

(ii) Chemically modified polymers are to be classified in the subheading appropriate to the unmodified polymer.

Polymer blends are to be classified in the same subheading as polymers of the same monomer units in the same proportions.

2. For the purposes of subheading 3920.43.00, the term “plasticisers” includes secondary plasticisers.

CHAPTER 40

RUBBER AND ARTICLES THEREOF

Notes.

1. Except where the context otherwise requires, throughout the Nomenclature the expression "rubber" means the following products, whether or not vulcanised or hard: natural rubber, balata, gutta-percha, guayule, chicle and similar natural gums, synthetic rubber, factice derived from oils, and such substances reclaimed.

2. This Chapter does not cover:

   (a) Goods of Section XI (textiles and textile articles);

   (b) Footwear or parts thereof of Chapter 64;

   (c) Headgear or parts thereof (including bathing caps) of Chapter 65;

   (d) Mechanical or electrical appliances or parts thereof of Section XVI (including electrical goods of all kinds), of hard rubber;

   (e) Articles of Chapters 90, 92, 94 or 96; or

   (f) Articles of Chapter 95 (other than sports gloves, mittens and mitts and articles of headings 40.11 to 40.13).

3. In headings 40.01 to 4003.00.00 and 40.05, the expression "primary forms" applies only to the following forms:

   (a) Liquids and pastes (including latex, whether or not pre-vulcanised, and other dispersions and solutions);
   (b) Blocks of irregular shape, lumps, bales, powders, granules, crumbs and similar bulk forms.

4. In Note 1 to this Chapter and in heading 40.02, the expression "synthetic rubber" applies to:

(a) Unsaturated synthetic substances which can be irreversibly transformed by vulcanisation with sulphur into non-thermoplastic substances which, at a temperature between 18°C and 29°C, will not break on being extended to three times their original length and will return, after being extended to twice their original length, within a period of five minutes, to a length not greater than one and a half times their original length. For the purposes of this test, substances necessary for the cross-linking, such as vulcanising activators or accelerators, may be added; the presence of substances as provided for by Note 5(B)(ii) and (iii) is also permitted. However, the presence of any substances not necessary for the cross-linking, such as extenders, plasticisers and fillers, is not permitted;

(b) Thioplasts (TM); and

(c) Natural rubber modified by grafting or mixing with plastics, depolymerised natural rubber, mixtures of unsaturated synthetic substances with saturated synthetic high polymers provided that all the above-mentioned products comply with the requirements concerning vulcanisation, elongation and recovery in (a) above.

5. (A) Headings 40.01 and 40.02 do not apply to any rubber or mixture of rubbers which has been compounded, before or after coagulation, with:

(i) vulcanising agents, accelerators, retarders or activators (other than those added for the preparation of pre-vulcanised rubber latex);

(ii) pigments or other colouring matter, other than those added solely for the purpose of identification;

(iii) plasticisers or extenders (except mineral oil in the case of oil-extended rubber), fillers, reinforcing agents, organic solvents or any other substances, except those permitted under (B).

(B) The presence of the following substances in any rubber or mixture of rubbers shall not affect its classification in heading 40.01 or 40.02, as the case may be, provided that such rubber or mixture of rubbers retains its essential character as a raw material:

(i) emulsifiers or anti-tack agents;

(ii) small amounts of breakdown products of emulsifiers;

(iii) very small amounts of the following: heat-sensitive agents (generally for obtaining thermosensitive rubber latexes), cationic surface-active agents (generally for obtaining electro-positive rubber latexes), antioxidants, coagulants, crumbling agents, freeze-resisting agents, peptisers, preservatives, stabilisers, viscosity-control agents, or similar special-purpose additives.

CHAPTER 40—*Continued*

RUBBER AND ARTICLES THEREOF—*Continued*

6. For the purposes of heading 4004.00.00, the expression "waste, parings and scrap" means rubber waste, parings and scrap from the manufacture or working of rubber and rubber goods definitely not usable as such because of cutting-up, wear or other reasons.

7. Thread wholly of vulcanised rubber, of which any cross-sectional dimension exceeds 5 mm, is to be classified as strip, rods or profile shapes, of heading 40.08.

8. Heading 40.10 includes conveyor or transmission belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber.

9. In headings 40.01, 40.02, 4003.00.00, 40.05 and 40.08, the expressions "plates", "sheets" and "strip" apply only to plates, sheets and strip and to blocks of regular geometric shape, uncut or simply cut to rectangular (including square) shape, whether or not having the character of articles and whether or not printed or otherwise surface-worked, but not otherwise cut to shape or further worked.

In heading 40.08 the expressions "rods" and "profile shapes" apply only to such products, whether or not cut to length or surface-worked but not otherwise worked.

CHAPTER 41

RAW HIDES AND SKINS (OTHER THAN FURSKINS) AND LEATHER

Notes.

1. This Chapter does not cover:

   (a) Parings or similar waste, of raw hides or skins (heading 05.11);

   (b) Birdskins or parts of birdskins, with their feathers or down, of heading 05.05 or 6701.00; or

   (c) Hides or skins, with the hair or wool on, raw, tanned or dressed (Chapter 43); the following are, however, to be classified in Chapter 41, namely, raw hides and skins with the hair or wool on, of bovine animals (including buffalo), of equine animals, of sheep or lambs (except Astrakhan, Broadtail, Caracul, Persian or similar lambs, Indian, Chinese, Mongolian or Tibetan lambs), of goats or kids (except Yemen, Mongolian or Tibetan goats and kids), of swine (including peccary), of chamois, of gazelle, of camels (including dromedaries), of reindeer, of elk, of deer, of roebucks or of dogs.

2. (A) Headings 41.04 to 41.06 do not cover hides and skins which have undergone a tanning (including pre-tanning) process which is reversible (headings 41.01to 41.03, as the case may be).

   (B) For the purposes of headings 41.04 to 41.06, the term "crust" includes hides and skins that have been retanned, coloured or fat-liquored (stuffed) prior to drying.

CHAPTER 48

PAPER AND PAPERBOARD; ARTICLES OF PAPER PULP, OF PAPER OR OF PAPERBOARD

Notes.

1. For the purposes of this Chapter, except where the context otherwise requires a reference to "paper" includes references to paperboard (irrespective of thickness or weight per m^2).

2. This Chapter does not cover:

   (a) Articles of Chapter 30;

   (b) Stamping foils of heading 32.12;

   (c) Perfumed papers or papers impregnated or coated with cosmetics (Chapter 33);

   (d) Paper or cellulose wadding impregnated, coated or covered with soap or detergent (heading 34.01), or with polishes, creams or similar preparations (heading 34.05);

   (e) Sensitised paper or paperboard of headings 37.01 to 3704.00.00;

   (f) Paper impregnated with diagnostic or laboratory reagents (heading 3822.00.00);

   (g) Paper-reinforced stratified sheeting of plastics, or one layer of paper or paperboard coated or covered with a layer of plastics, the latter constituting more than half the total thickness, or articles of such materials, other than wall coverings of heading 48.14 (Chapter 39);

   (h) Articles of heading 42.02 (for example, travel goods);

   (ij) Articles of Chapter 46 (manufactures of plaiting material);

   (k) Paper yarn or textile articles of paper yarn (Section XI);

   (l) Articles of Chapter 64 or Chapter 65;

   (m) Abrasive paper or paperboard (heading 68.05) or paper- or paperboard-backed mica (heading 68.14) (paper and paperboard coated with mica powder are, however, to be classified in this Chapter);

   (n) Metal foil backed with paper or paperboard (generally Section XIV or XV);

(o) Articles of heading 92.09; or

(p) Articles of Chapter 95 (for example, toys, games, sports requisites) or Chapter 96 (for example, buttons).

3. Subject to the provisions of Note 7, headings 4801.00.00 to 48.05 include paper and paperboard which have been subjected to calendering, super-calendering, glazing or similar finishing, false water-marking or surface sizing, and also paper, paperboard, cellulose wadding and webs of cellulose fibres, coloured or marbled throughout the mass by any method. Except where heading 4803.00 otherwise requires, these headings do not apply to paper, paperboard, cellulose wadding or webs of cellulose fibres which have been otherwise processed.

4. In this Chapter the expression "newsprint" means uncoated paper of a kind used for the printing of newspapers, of which not less than 50% by weight of the total fibre content consists of wood fibres obtained by a mechanical or chemi-mechanical process, unsized or very lightly sized, having a surface roughness Parker Print Surf (1 MPa) on each side exceeding 2.5 micrometres (microns), weighing not less than 40 g/m^2 and not more than 65 g/m^2.

5. For the purposes of heading 48.02, the expressions "paper and paperboard, of a kind used for writing, printing or other graphic purposes" and "non perforated punch-cards and punch tape paper" mean paper and paperboard made mainly from bleached pulp or from pulp obtained by a mechanical or chemi-mechanical process and satisfying any of the following criteria:

For paper or paperboard weighing not more than 150 g/m^2:

(a) Containing 10% or more of fibres obtained by a mechanical or chemi-mechanical process, and

(i) weighing not more than 80 g/m^2, or

(ii) coloured throughout the mass; or

(b) Containing more than 8% ash, and

(i) weighing not more than 80 g/m^2, or

(ii) coloured throughout the mass; or

(c) Containing more than 3% ash and having a brightness of 60% or more; or

(d) Containing more than 3% but not more than 8% ash, having a brightness less than 60%, and a burst index equal to or less than 2.5 $kPa \cdot m^2/g$; or

(e) Containing 3% ash or less, having a brightness of 60% or more and a burst index equal to or less than 2.5 $kPa \cdot m^2/g$.

CHAPTER 48—*Continued*

PAPER AND PAPERBOARD; ARTICLES OF PAPER PULP, OF PAPER OR OF PAPERBOARD—*Continued*

For paper or paperboard weighing more than 150 g/m^2:

(a) Coloured throughout the mass; or

(b) Having a brightness of 60% or more, and

(i) a caliper of 225 micrometres (microns) or less, or

(ii) a caliper of more than 225 micrometres (microns) but not more than 508 micrometres (microns) and an ash content of more than 3%; or

(c) Having a brightness of less than 60%, a caliper of 254 micrometres (microns) or less and an ash content of more than 8%.

Heading 48.02 does not, however, cover filter paper or paperboard (including tea-bag paper) or felt paper or paperboard.

6. In this Chapter "kraft paper and paperboard" means paper and paperboard of which not less than 80% by weight of the total fibre content consists of fibres obtained by the chemical sulphate or soda processes.

7. Except where the terms of the headings otherwise require, paper, paperboard, cellulose wadding and webs of cellulose fibres answering to a description in two or more of the headings 4801.00.00 to 48.11 are to be classified under that one of such headings which occurs last in numerical order in the Nomenclature.

8. Headings 4801.00.00 and 4803.00 to 48.09 apply only to paper, paperboard, cellulose wadding and webs of cellulose fibres:

(a) In strips or rolls of a width exceeding 36 cm; or

(b) In rectangular (including square) sheets with one side exceeding 36 cm and the other side exceeding 15 cm in the unfolded state.

9. For the purposes of heading 48.14, the expression "wallpaper and similar wall coverings" applies only to:

(a) Paper in rolls, of a width of not less than 45 cm and not more than 160 cm, suitable for wall or ceiling decoration:

(i) Grained, embossed, surface-coloured, design-printed or otherwise surface-decorated (for example, with textile flock), whether or not coated or covered with transparent protective plastics;

(ii) With an uneven surface resulting from the incorporation of particles of wood, straw, etc.;

(iii) Coated or covered on the face side with plastics, the layer of plastics being grained, embossed, coloured, design-printed or otherwise decorated; or

(iv) Covered on the face side with plaiting material, whether or not bound together in parallel strands or woven;

(b) Borders and friezes, of paper, treated as above, whether or not in rolls, suitable for wall or ceiling decoration;

(c) Wall coverings of paper made up of several panels, in rolls or sheets, printed so as to make up a scene, design or motif when applied to a wall.

Products on a base of paper or paperboard, suitable for use both as floor coverings and as wall coverings, are to be classified in heading 48.23.

10. Heading 48.20 does not cover loose sheets or cards, cut to size, whether or not printed, embossed or perforated.

11. Heading 48.23 applies, *inter alia*, perforated paper or paperboard cards for Jacquard or similar machines and paper lace.

12. Except for the goods of heading 48.14 or 48.21, paper, paperboard, cellulose wadding and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in Chapter 49.

Subheading Notes.

1. For the purposes of subheadings 4804.11.00 and 4804.19.00, "kraftliner" means machine-finished or machine-glazed paper and paperboard, of which not less than 80% by weight of the total fibre content consists of wood fibres obtained by the chemical sulphate or soda processes, in rolls, weighing more than 115g/m^2 and having a minimum Mullen bursting strength as indicated in the following table or the linearly interpolated or extrapolated equivalent for any other weight.

For the purposes of subheadings 4804.21.00 and 4804.29.00, "sack kraft paper" means machine-finished paper, of which not less than 80% by weight of the total fibre content consists of fibres obtained by the chemical sulphate or soda processes, in rolls, weighing not less than 60 g/m^2 but not more than 115 g/m^2 and meeting one of the following sets of specifications:

(a) Having a Mullen burst index of not less than 3.7 kPa·m^2/g and a stretch factor of more than 4.5% in the cross direction and of more than 2% in the machine direction.

(b) Having minima for tear and tensile as indicated in the following table or the linearly interpolated equivalent for any other weight:

	Minimum tear mN		**Minimum tensile kN/m**	
Weight G/m^2	**Machine Direction**	**Machine direction plus cross direction**	**Cross Direction**	**Machine direction plus cross direction**
60	700	1,510	1.9	6
70	830	1,790	2.3	7.2
80	965	2,070	2.8	8.3
100	1,230	2,635	3.7	10.6
115	1,425	3,060	4.4	12.3

3. For the purposes of subheading 4805.11.00, "semi-chemical fluting paper" means paper, in rolls, of which not less than 65% by weight of the total fibre content consists of unbleached hardwood fibres obtained by a semi-chemical pulping process, and having a CMT 30 (Corrugated Medium Tests with 30 minutes of conditioning) crush resistance exceeding 1.8 newtons/g/m^2 at 50% relative humidity, at 23 ^{0}C.

4. Subheading 4805.12.00 covers paper, in rolls, made mainly of straw pulp obtained by a semi-chemical process, weighing 130 g/m^2 or more, and having a CMT 30 (Corrugated Medium Test with 30 minutes of conditioning) crush resistance exceeding 1.4 newtons/g/m^2 at 50% relative humidity 23 ^{o}C.

5. Subheadings 4805.24.00 and 4805.25.00 cover paper and paperboard made wholly or mainly of pulp of recovered (waste and scrap) paper or paperboard. Testliner may also have a surface layer of dyed paper or of paper made of bleached or unbleached non-recovered pulp. These products have a Mullen burst index of not less than 2 kPa·m^2/g.

6. For the purposes of subheading 4805.30.00, "sulphite wrapping paper" means machine-glazed paper, of which more than 40% by weight of the total fibre content consists of wood fibres obtained by the chemical sulphite process, having an ash content not exceeding 8% and having a Mullen burst index of not less than 1.47 $kPa \cdot m^2/g$.

7. For the purposes of subheading 4810.22.00, "light-weight coated paper" means paper, coated on both sides, of a total weight not exceeding 72 g/m^2, with a coating weight not exceeding 15 g/m^2 per side, on a base of which not less than 50% by weight of the total fibre content consists of wood fibres obtained by a mechanical process.

2. (A) Goods classifiable in Chapters 50 to 55 or in heading 5809.00.00 or 59.02 and of a mixture of two or more textile materials are to be classified as if consisting wholly of that one textile material which predominates by weight over any other single textile material.

When no one textile material predominates by weight, the goods are to be classified as if consisting wholly of that one textile material which is covered by the heading which occurs last in numerical order among those which equally merit consideration.

(B) For the purposes of the above rule:

(a) Gimped horsehair yarn (heading 5110.00.00) and metallised yarn (heading 5605.00.00) are to be treated as a single textile material the weight of which is to be taken as the aggregate of the weights of its components; for the classification of woven fabrics, metal thread is to be regarded as a textile material;

(b) The choice of appropriate heading shall be effected by determining **first** the Chapter and **then** the applicable heading within that Chapter, disregarding any materials not classified in that Chapter;

(c) When both Chapters 54 and 55 are involved with any other Chapter, Chapters 54 and 55 are to be treated as a single Chapter;

(d) Where a Chapter or a heading refers to goods of different textile materials, such materials are to be treated as a single textile material.

(C) The provisions of paragraphs (A) and (B) above apply also to the yarns referred to in Notes 3, 4, 5 or 6 below.

3. (A) For the purposes of this Section, and subject to the exceptions in paragraph (B) below, yarns (single, multiple (folded) or cabled) of the following descriptions are to be treated as "twine, cordage, ropes and cables":

(a) Of silk or waste silk, measuring more than 20,000 decitex;

SECTION XI—*Continued*

TEXTILES AND TEXTILE ARTICLES—*Continued*

(b) In balls, hanks or skeins of a weight not exceeding:

(i) 85 g in the case of man-made filament yarn of less than 3,000 decitex, silk or silk waste;

(iii) 500 g in other cases;

(c) In hanks or skeins comprising several smaller hanks or skeins separated by dividing threads which render them independent one of the other, each of uniform weight not exceeding:

(ii) 125 g in other cases.

(B) Exceptions:

(a) Single yarn of any textile material, except:

5. For the purposes of headings 52.04, 54.01 and 55.08 the expression "sewing thread" means multiple (folded) or cabled yarn:

(a) Put up on supports (for example, reels, tubes) of a weight (including support) not exceeding 1,000 g;

(b) Dressed for use as sewing thread; and

(c) With a final "Z" twist.

6. For the purposes of this Section, the expression "high tenacity yarn" means yarn having a tenacity, expressed in cN/tex (centinewtons per tex), greater than the following:

Single yarn of nylon or other polyamides, or of polyesters ……..60 cN/tex

Multiple (folded) or cabled yarn of nylon or other polyamides, or of polyesters……53 cN/tex

Single, multiple (folded) or cabled yarn of viscose rayon ……..27 cN/tex.

7. For the purposes of this Section, the expression "made-up" means:

(a) Cut otherwise than into squares or rectangles;

(b) Produced in the finished state, ready for use (or merely needing separation by cutting dividing threads) without sewing or other working (for example, certain dusters, towels, table cloths, scarf squares, blankets);

(c) Hemmed or with rolled edges, or with a knotted fringe at any of the edges, but excluding fabrics the cut edges of which have been prevented from unravelling by whipping or by other simple means;

(d) Cut to size and having undergone a process of drawn thread work;

(e) Assembled by sewing, gumming or otherwise (other than piece goods consisting of two or more lengths of identical material joined end to end and piece goods composed of two or more textiles assembled in layers, whether or not padded);

(f) Knitted or crocheted to shape, whether presented as separate items or in the form of a number of items in the length.

8. For the purposes of Chapters 50 to 60:

SECTION XI—*Continued*

TEXTILES AND TEXTILE ARTICLES—*Continued*

(a) Chapters 50 to 55 and 60 and, except where the context otherwise requires, Chapters 56 to 59 do not apply to goods made up within the meaning of Note 7 above; and

(b) Chapters 50 to 55 and 60 do not apply to goods of Chapters 56 to 59.

9. The woven fabrics of Chapters 50 to 55 include fabrics consisting of layers of parallel textile yarns superimposed on each other at acute or right angles. These layers are bonded at the intersections of the yarns by an adhesive or by thermal bonding.

10. Elastic products consisting of textile materials combined with rubber threads are classified in this Section.

11. For the purposes of this Section, the expression "impregnated" includes "dipped".

12. For the purposes of this Section, the expression "polyamides" includes "aramids".

13. For the purposes of this Section and, where applicable, throughout the Nomenclature, the expression “elastomeric yarn” means filament yarn, including monofilament, of synthetic textile material, other than textured yarn, which does not break on being extended to three times its original length and which returns, after being extended to twice its original length, within a period of five minutes, to a length not greater than one and a half times its original length.

14. Unless the context otherwise requires, textile garments of different headings are to be classified in their own headings even if put up in sets for retail sale. For the purposes of this Note, the expression "textile garments" means garments of headings 61.01 to 61.14 and headings 62.01 to 62.11.

Subheading Notes.

1. In this Section and, where applicable, throughout the Nomenclature, the following expressions have the meanings hereby assigned to them:

(a) **Unbleached yarn**

Yarn which:

(i) has the natural colour of its constituent fibres and has not been bleached, dyed (whether or not in the mass) or printed; or

(ii) is of indeterminate colour ("grey yarn"), manufactured from garnetted stock.

Such yarn may have been treated with a colourless dressing or fugitive dye (which disappears after simple washing with soap) and, in the case of man-made fibres, treated in the mass with delustring agents (for example, titanium dioxide).

(b) **Bleached yarn**

Yarn which:

(i) has undergone a bleaching process, is made of bleached fibres or, unless the context otherwise requires, has been dyed white (whether or not in the mass) or treated with a white dressing;

(ii) consists of a mixture of unbleached and bleached fibres; or

(iii) is multiple (folded) or cabled and consists of unbleached and bleached yarns.

(c) **Coloured (dyed or printed) yarn**

Yarn which:

(i) is dyed (whether or not in the mass) other than white or in a fugitive colour, or printed, or made from dyed or printed fibres;

(ii) consists of a mixture of dyed fibres of different colours or of a mixture of unbleached or bleached fibres with coloured fibres (marl or mixture yarns), or is printed in one or more colours at intervals to give the impression of dots;

(iii) is obtained from slivers or rovings which have been printed; or

(iv) is multiple (folded) or cabled and consists of unbleached or bleached yarn and coloured yarn.

SECTION XI—*Continued*

TEXTILES AND TEXTILE ARTICLES—*Continued*

The above definitions also apply, *mutatis mutandis*, to monofilament and to strip or the like of Chapter 54.

(d) **Unbleached woven fabric**

Woven fabric made from unbleached yarn and which has not been bleached, dyed or printed. Such fabric may have been treated with a colourless dressing or a fugitive dye.

(e) **Bleached woven fabric**

Woven fabric which:

(i) has been bleached or, unless the context otherwise requires, dyed white or treated with a white dressing, in the piece;

(ii) consists of bleached yarn; or

(iii) consists of unbleached and bleached yarn.

(f) **Dyed woven fabric**

Woven fabric which:

(i) is dyed a single uniform colour other than white (unless the context otherwise requires) or has been treated with a coloured finish other than white (unless the context otherwise requires), in the piece; or

(ii) consists of coloured yarn of a single uniform colour.

(g) **Woven fabric of yarns of different colours**

Woven fabric (other than printed woven fabric) which:

(i) consists of yarns of different colours or yarns of different shades of the same colour (other than the natural colour of the constituent fibres);

(ii) consists of unbleached or bleached yarn and coloured yarn; or

(iii) consists of marl or mixture yarns.

(In all cases, the yarn used in selvedges and piece ends is not taken into consideration.)

(h) **Printed woven fabric**

Woven fabric which has been printed in the piece, whether or not made from yarns of different colours.

(The following are also regarded as printed woven fabrics: woven fabrics bearing designs made, for example, with a brush or spray gun, by means of transfer paper, by flocking or by the batik process.)

The process of mercerisation does not affect the classification of yarns or fabrics within the above categories.

The definitions at (d) to (h) above apply, *mutatis mutandis*, to knitted or crocheted fabrics.

(ij) **Plain weave**

A fabric construction in which each yarn of the weft passes alternately over and under successive yarns of the warp and each yarn of the warp passes alternately over and under successive yarns of the weft.

2. (A) Products of Chapters 56 to 63 containing two or more textile materials are to be regarded as consisting wholly of that textile material which would be selected under Note 2 to this Section for the classification of a product of Chapters 50 to 55 or of heading 5809.00.00 consisting of the same textile materials.

(B) For the application of this rule:

(a) Where appropriate, only the part which determines the classification under Interpretative Rule 3 shall be taken into account;

(b) In the case of textile products consisting of a ground fabric and a pile or looped surface no account shall be taken of the ground fabric;

(c) In the case of embroidery of heading 58.10 and goods thereof, only the ground fabric shall be taken into account. However, embroidery without visible ground, and goods thereof, shall be classified with reference to the embroidering threads alone.

CHAPTER 54

MAN-MADE FILAMENTS; STRIP AND THE LIKE OF MAN-MADE TEXTILE MATERIALS

Notes.

1. Throughout the Nomenclature, the term "man-made fibres" means staple fibres and filaments of organic polymers produced by manufacturing processes, either:

   (a) By polymerisation of organic monomers to produce polymers such as polyamides, polyesters, polyolefins or polyurethanes, or by chemical modification or polymers produced by this process (for example, poly(vinyl alcohol) prepared by the hydrolysis of poly(vinyl acetate)); or

   (b) By dissolution or chemical treatment of natural organic polymers (for example, cellulose) to produce polymers such as cuprammonium rayon (cupro) or viscose rayon, or by chemical modification or natural organic polymers (for example cellulose, casein and other proteins, or alginic acid), to produce polymers such as cellulose acetate or algmates.

   The terms "synthetic" and "artificial", used in relation to fibres, mean: synthetic: fibres as defined at (a); artificial : fibres as defined at (b). Strip and the like of heading 54.04 or 5405.00.00 are not considered to be man-made fibres.

   The terms "man-made", "synthetic" and "artificial" shall have the same meanings when used in relation to "textile materials".

2. . Headings 54.02 and 54.03 do not apply to synthetic or artificial filament tow of Chapter 55.

CHAPTER 55

MAN-MADE STAPLE FIBRES

Note.

1. Headings 55.01 and 5502.00.00 apply only to man-made filament tow, consisting of parallel filaments of a uniform length equal to the length of the tow, meeting the following specifications:

   (a) Length of tow exceeding 2 m;

   (b) Twist less than 5 turns per metre;

   (c) Measuring per filament less than 67 decitex;

   (d) Synthetic filament tow only : the tow must be drawn, that is to say, be incapable of being stretched by more than 100% of its length;

   (e) Total measurement of tow more than 20,000 decitex.

   Tow of a length not exceeding 2 m is to be classified in heading 55.03 or 55.04.

CHAPTER 56

WADDING, FELT AND NONWOVENS; SPECIAL YARNS; TWINE, CORDAGE, ROPES AND CABLES AND ARTICLES THEREOF

Notes.

1. This Chapter does not cover:

   (a) Wadding, felt or nonwovens, impregnated, coated or covered with substances or preparations (for example, perfumes or cosmetics of Chapter 33, soaps or detergents of heading 34.01, polishes, creams or similar preparations of heading 34.05, fabric softeners of heading 38.09) where the textile material is present merely as a carrying medium;

   (b) Textile products of heading 5811.00.00;

   (c) Natural or artificial abrasive powder or grain, on a backing of felt or nonwovens (heading 68.05);

   (d) Agglomerated or reconstituted mica, on a backing of felt or nonwovens (heading 68.14); or

   (e) Metal foil on a backing of felt or nonwovens (Section XIV or XV).

2. The term "felt" includes needleloom felt and fabrics consisting of a web of textile fibres the cohesion of which has been enhanced by a stitch-bonding process using fibres from the web itself.

3. Headings 56.02 and 56.03 cover respectively felt and nonwovens, impregnated, coated, covered or laminated with plastics or rubber whatever the nature of these materials (compact or cellular).

   Heading 56.03 also includes nonwovens in which plastics or rubber forms the bonding substance.

   Headings 56.02 and 56.03 do not, however, cover:

   (a) Felt impregnated, coated, covered or laminated with plastics or rubber, containing 50% or less by weight of textile material or felt completely embedded in plastics or rubber (Chapter 39 or 40);

   (b) Nonwovens, either completely embedded in plastics or rubber, or entirely coated or covered on both sides with such materials, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39 or 40); or

(c) Plates, sheets or strip of cellular plastics or cellular rubber combined with felt or nonwovens, where the textile material is present merely for reinforcing purposes (Chapter 39 or 40).

4. Heading 56.04 does not cover textile yarn, or strip or the like of heading 54.04 or 5405.00.00, in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55); for the purpose of this provision, no account should be taken of any resulting change of colour.

IMPREGNATED, COATED, COVERED OR LAMINATED TEXTILE FABRICS; TEXTILE ARTICLES OF A KIND SUITABLE FOR INDUSTRIAL USE

Notes.

1. Except where the context otherwise requires, for the purposes of this Chapter the expression "textile fabrics" applies only to the woven fabrics of Chapters 50 to 55 and headings 5803.00.00 and 58.06, the braids and ornamental trimmings in the piece of heading 58.08 and the knitted or crocheted fabrics of headings 60.02 to 60.06.

2. Heading 59.03 applies to:

      (i) Fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of colour;

      (ii) Products which cannot, without fracturing, be bent manually around a cylinder of a diameter of 7 mm, at a temperature between 15°C and 30°C (usually Chapter 39);

      (iii) Products in which the textile fabric is either completely embedded in plastics or entirely coated or covered on both sides with such material, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39);

      (iv) Fabrics partially coated or partially covered with plastics and bearing designs resulting from these treatments (usually Chapters 50 to 55, 58 or 60);

      (v) Plates, sheets or strip of cellular plastics, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 39); or

3. For the purposes of headings 61.03 and 61.04:

   (a) The term "suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising:

   (i) one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket; and

   (ii) one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs.

   All of the components of a "suit" must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.

   If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

CHAPTER 61—*Continued*

The term "suit" includes the following sets of garments, whether or not they fulfill all the above conditions:

(iii) morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;

(iv) evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;

(v) dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

(b) The term "ensemble" means a set of garments (other than suits and articles of heading 6l.07, 61.08 or 61.09), composed of several pieces made up in identical fabric, put up for retail sale, and comprising:

(i) one garment designed to cover the upper part of the body, with the exception of pullovers which may form a second upper garment in the sole context of twin sets, and of waistcoats which may also form a second upper garment, and

(ii) one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they also must be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski suits, of heading 61.12.

4. Headings 61.05 and 61.06 do not cover garments with pockets below the waist, with a ribbed waistband or other means of tightening at the bottom of the garment, or garments having an average of less than 10 stitches per linear centimetre in each direction counted on an area measuring at least 10 cm x 10 cm. Heading 61.05 does not cover sleeveless garments.

5. Heading 61.09 does not cover garments with a drawstring, ribbed waistband or other means of tightening at the bottom of the garment.

6. For the purposes of heading 61.11:

(a) The expression "babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 cm; it also covers babies' napkins;

(b) Articles which are, *prima facie*, classifiable both in heading 61.11 and in other headings of this Chapter are to be classified in heading 61.11.

7. For the purposes of heading 61.12, "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:

(a) a "ski overall", that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or

(b) a "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:

(i) one garment such as an anorak, wind-cheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and

(ii) one pair of trousers whether or not extending above waist-level, one pair of breeches or one bib and brace overall.

The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same colour; they also must be of corresponding or compatible size.

8. Garments which are, *prima facie*, classifiable both in heading 6113.00.00 and in other headings of this Chapter, excluding heading 61.11, are to be classified in heading 6113.00.00.

9. Garments of this Chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.

10. Articles of this Chapter may be made of metal thread.

CHAPTER 62

ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, NOT KNITTED OR CROCHETED

Notes.

1. This Chapter applies only to made up articles of any textile fabric other than wadding, excluding knitted or crocheted articles (other than those of heading 62.12).

2. This Chapter does not cover:

   (a) Worn clothing or other worn articles of heading 6309.00.00; or

   (b) Orthopaedic appliances, surgical belts, trusses or the like (heading 90.21).

3. For the purposes of headings 62.03 and 62.04:

   (a) The term "suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising:

      (i) one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket; and

      (ii) one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs.

      All of the components of a "suit" must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.

      If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

The term "suit" includes the following sets of garments, whether or not they fulfill all the above conditions:

(iii) morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;

(iv) evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;

(v) dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

(b) The term "ensemble" means a set of garments (other than suits and articles of heading 62.07 or 62.08) composed of several pieces made up in identical fabric, put up for retail sale, and comprising:

(i) one garment designed to cover the upper part of the body, with the exception of waistcoats which may also form a second upper garment, and

(ii) one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they also must be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski suits, of heading 62.11.

4. For the purposes of heading 62.09:

(a) The expression "babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 cm; it also covers babies' napkins;

(b) Articles which are, *prima facie*, classifiable both in heading 62.09 and in other headings of this Chapter are to be classified in heading 62.09.

5. Garments which are, *prima facie*, classifiable both in heading 62.10 and in other headings of this Chapter, excluding heading 62.09, are to be classified in heading 62.10.

6. For the purposes of heading 62.11, "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:

(a) A "ski overall", that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps, or

CHAPTER 62—*Continued*

ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, NOT KNITTED OR CROCHETED—*Continued*

(b) A "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:

(i) one garment such as an anorak, wind-cheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and

(ii) one pair of trousers whether or not extending above waist-level, one pair of breeches or one bib and brace overall.

The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same colour; they also must be of corresponding or compatible size.

CHAPTER 70

GLASS AND GLASSWARE

Notes.

1. This Chapter does not cover:

   (a) Goods of heading 32.07 (for example, vitrifiable enamels and glazes, glass frit, other glass in the form of powder, granules or flakes);

   (b) Articles of Chapter 71 (for example, imitation jewellery);

   (c) Optical fibre cables of heading 85.44, electrical insulators (heading 85.46) or fittings of insulating material of heading 85.47;

   (d) Optical fibres, optically worked optical elements, hypodermic syringes, artificial eyes, thermometers, barometers, hydrometers or other articles of Chapter 90;

   (e) Lamps or lighting fittings, illuminated signs, illuminated name-plates or the like, having a permanently fixed light source, or parts thereof of heading 94.05;

   (f) Toys, games, sports requisites, Christmas tree ornaments or other articles of Chapter 95 (excluding glass eyes without mechanisms for dolls or for other articles of Chapter 95); or

   (g) Buttons, fitted vacuum flasks, scent or similar sprays or other articles of Chapter 96.

2. For the purposes of headings 70.03, 70.04 and 70.05:

   (a) glass is not regarded as "worked" by reason of any process it has undergone before annealing;

   (b) cutting to shape does not affect the classification of glass in sheets;

   (c) the expression "absorbent, reflecting or non-reflecting layer" means a microscopically thin coating of metal or of a chemical compound (for example, metal oxide) which absorbs, for example, infra-red light or improves the reflecting qualities of the glass while still allowing it to retain a degree of transparency or translucency; or which prevents light from being reflected on the surface of the glass.

3. The products referred to in heading 7006.00.00 remain classified in that heading whether or not they have the character of articles.

4. For the purposes of heading 70.19, the expression “glass wool” means:

(a) Mineral wools with a silica (SiO_2) content not less than 60% by weight;

(b) Mineral wools with a silica (SiO_2) content less than 60% but with an alkaline oxide (K_2O or Na_2O) content exceeding 5% by weight or a boric oxide (B_2O_3) content exceeding 2% by weight.

Mineral wools which do not comply with the above specifications fall in heading 68.06.

5. Throughout the Nomenclature, the expression "glass" includes fused quartz and other fused silica.

Subheading Note.

For the purposes of subheadings 7013.22.00, 7013.33.00, 7013.41.00 and 7013.91.00, the expression "lead crystal" means only glass having a minimum lead monoxide (PbO) content by weight of 24%.

Alloys of precious metal are to be classified according to the following rules:

(a) An alloy containing 2% or more, by weight, of platinum is to be treated as an alloy of platinum;

(b) An alloy containing 2% or more, by weight, of gold but no platinum, or less than 2%, by weight, of platinum, is to be treated as an alloy of gold;

Except where the context otherwise requires, any reference in the Nomenclature to precious metal or to any particular precious metal includes a reference to alloys treated as alloys of precious metal or of the particular metal in accordance with the rules in Note 5 above, but not to metal clad with precious metal or to base metal or non-metals plated with precious metal.

7. Throughout the Nomenclature the expression "metal clad with precious metal" means material made with a base of metal upon one or more surfaces of which there is affixed by soldering, brazing, welding, hot-rolling or similar mechanical means a covering of precious metal. 10. For the purposes of heading 71.14, the expression "articles of goldsmiths' or silversmiths' wares" includes such articles as ornaments, tableware, toilet-ware, smokers' requisites and other articles of household, office or religious use.

11. For the purposes of heading 71.17, the expression "imitation jewellery" means articles of jewellery within the meaning of paragraph (a) of Note 9 above (but not including buttons or other articles of heading 96.06, or dress-combs, hair-slides or the like, or hairpins, of heading 96.15), not incorporating natural or cultured pearls, precious or semi-precious stones (natural, synthetic or reconstructed) nor (except as plating or as minor constituents) precious metal or metal clad with precious metal.

2. For the classification of ferro-alloys in the subheadings of heading 72.02 the following rule should be observed:

A ferro-alloy is considered as binary and classified under the relevant subheading (if it exists) if only one of the alloy elements exceeds the minimum percentage laid down in Chapter Note 1(c); by analogy, it is considered respectively as ternary or quaternary if two or three alloy elements exceed the minimum percentage.

For the application of this rule the unspecified "other elements" referred to in Chapter Note 1(c) must each exceed 10% by weight.

CHAPTER 73

ARTICLES OF IRON OR STEEL

Notes.

1. In this Chapter the expression "cast iron" applies to products obtained by casting in which iron predominates by weight over each of the other elements and which do not comply with the chemical composition of steel as defined in Note 1(d) to Chapter 72.

2. In this Chapter the word "wire" means hot or cold-formed products of any cross-sectional shape, of which no cross-sectional dimension exceeds 16 mm.

CHAPTER 74

COPPER AND ARTICLES THEREOF

Note.

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) **Refined copper**

Metal containing at least 99.85% by weight of copper; or

Metal containing at least 97.5% by weight of copper, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE – Other elements

Element	Limiting content % by weight
Ag Silver	0.25
As Arsenic	0.5
Cd Cadmium	1.3
Cr Chromium	1.4
Mg Magnesium	0.8
Pb Lead	1.5
S Sulphur	0.7
Sn Tin	0.8
Te Tellurium	0.8
Zn Zinc	1
Zr Zirconium	0.3
Other elements *, each	0.3

*Other elements are, for example, Al, Be, Co, Fe, Mn, Ni, Si.

(b) **Copper alloys**

Metallic substances other than unrefined copper in which copper predominates by weight over each of the other elements, provided that:

(i) the content by weight of at least one of the other elements is greater than the limit specified in the foregoing table; or

(ii) the total content by weight of such other elements exceeds 2.5%.

CHAPTER 74—*Continued*

COPPER AND ARTICLES THEREOF—*Continued*

(c) **Master alloys**

Alloys containing with other elements more than 10% by weight of copper, not usefully malleable and commonly used as an additive in the manufacture of other alloys or as de-oxidants, de-sulphurising agents or for similar uses in the metallurgy of non-ferrous metals. However, copper phosphide (phosphor copper) containing more than 15% by weight of phosphorus falls in heading 2848.00.00.

(d) **Bars and rods**

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

Wire-bars and billets with their ends tapered or otherwise worked simply to facilitate their entry into machines for converting them into, for example, drawing stock (wire-rod) or tubes, are however to be taken to be unwrought copper of heading 74.03.

(e) **Profiles**

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(f) **Wire**

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides

being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

(g) **Plates, sheets, strip and foil**

Flat-surfaced products (other than the unwrought products of heading 74.03), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

(i) of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

(ii) of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Headings 74.09 and 74.10 apply, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(h) **Tubes and pipes**

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be taken to be tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

NICKEL AND ARTICLES THEREOF

Note.

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) **Bars and rods**

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) **Profiles**

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) **Wire**

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

CHAPTER 75—*Continued*

NICKEL AND ARTICLES THEREOF—*Continued*

(d) **Plates, sheets, strip and foil**

(i) of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

(ii) of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading 75.06 applies, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) **Tubes and pipes**

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular, or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) **Profiles**

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) **Wire**

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

(d) **Plates, sheets, strip and foil**

Flat-surfaced products (other than the unwrought products of heading 78.01), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

(i) of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

(ii) of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading 78.04 applies, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) **Tubes and pipes**

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross- section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

2. Parts of base metal of the articles of this Chapter are to be classified with the articles of which they are parts, except parts separately specified as such and tool-holders for hand tools (heading 84.66). However, parts of general use as defined in Note 2 to Section XV are in all cases excluded from this Chapter.

(B) Automatic data processing machines may be in the form of systems consisting of a variable number of separate units.

*Heading 84:22 appears to have been omitted when the First Schedule was replaced by LN 22/2007.

(C) Subject to paragraphs (D) and (E) below, a unit is to be regarded as being part of an automatic data processing system if it meets all of the following conditions:

(i) it is of a kind solely or principally used in an automatic data processing system;

(ii) it is connectable to the central processing unit either directly or through one or more other units; and

(iii) it is able to accept or deliver data in a form (codes or signals) which can be used by the system.

Heading 84.79 also covers machines for making rope or cable (for example, stranding, twisting or cabling machines) from metal wire, textile yarn or any other material or from a combination of such materials.

8. For the purposes of heading 84.70, the term "pocket-size" applies only to machines the dimensions of which do not exceed 170 mm x 100 mm x 45 mm.

9. (A) Notes 8 (a) and 8 (b) to Chapter 85 also apply with respect to the expressions "semiconductor devices" and "electronic integrated circuits", respectively, as used in this Note and in heading 84.86. However, for the purposes of this Note and of heading 84.86, the expression "semiconductor devices" also covers photosensitive semiconductor devices and light emitting diodes.

CHAPTER 85

ELECTRICAL MACHINERY AND EQUIPMENT AND PARTS THEREOFF; SOUND RECORDERS AND REPRODUCERS, TELEVISION IMAGE AND SOUND RECORDERS AND REPRODUCERS, AND PARTS AND ACCESSORIES OF SUCH ARTICLES

Notes.

1. This Chapter does not cover:

   (a) Electrically warmed blankets, bed pads, foot-muffs or the like; electrically warmed clothing, footwear or ear pads or other electrically warmed articles worn on or about the person;

   (b) Articles of glass of heading 70.11;

   (c) Machines and apparatus of heading 84.86;

   (d) Vacuum apparatus of a kind used in medical, surgical, dental or veterinary purposes (Chapter 90); or

   (e) Electrically heated furniture of Chapter 94.

2. Headings 85.01 to 85.04 do not apply to goods described in heading 85.11, 85.12, 85.40, 85.41 or 85.42.

   However, metal tank mercury arc rectifiers remain classified in heading 85.04.

3. Heading 85.09 covers only the following electro-mechanical machines of the kind commonly used for domestic purposes:

   (a) Floor polishers, food grinders and mixers, and fruit or vegetable juice extractors, of any weight;

   (b) Other machines provided the weight of such machines does not exceed 20 kg.

   The heading does not, however, apply to fans or ventilating or recycling hoods incorporating a fan, whether or not fitted with filters (heading 84.14), centrifugal clothes-dryers (heading 84.21), dish washing machines (heading 84.22),*household washing machines (heading 84.50), roller or other ironing machines (heading 84.20 or 84.51), sewing machines (heading 84.52), electric scissors (heading 84.67) or to electro-thermic appliances (heading 85.16).

**See* Note on page 654.

4. For the purposes of heading 85.23 :

(a) "Solid-state non-volatile storage devices" (for example, "flash memory cards" or "flash electronic storage cards") are storage devices with a connecting socket, comprising in the same housing one or more flash memories (for example, "FLASH E^2 PROM") in the form of integrated circuits mounted on a printed circuit board. They may include a controller in the form of an integrated circuit and discrete passive components, such as capacitors and resistors;

(b) The term "smart cards" means cards which have embedded in them one or more electronic integrated circuits (a microprocessor, random access memory (RAM) or read-only memory (ROM)) in the form of chips. These cards may contain contacts, a magnetic stripe or an embedded antenna but do not contain any other active or passive circuit elements.

5. For the purposes of heading 8534.00.00 "printed circuits" are circuits obtained by forming on an insulating base, by any printing process (for example, embossing, plating-up, etching) or by the "film circuit" technique, conductor elements, contacts or other printed components (for example, inductances, resistors, capacitors) alone or interconnected according to a pre- established pattern, other than elements which can produce, rectify, modulate or amplify an electrical signal (for example, semiconductor elements).

The expression "printed circuits" does not cover circuits combined with elements other than those obtained during the printing process, nor does it cover individual, discrete resistors, capacitors or inductances. Printed circuits may, however, be fitted with non-printed connecting elements.

Thin- or thick-film circuits comprising passive and active elements obtained during the same technological process are to be classified in heading 85.42.

6. For the purpose of heading 85.36, "connectors for optical fibres, optical fibre bundles or cables" means connectors that simply mechanically align optical fibres end to end in a digital line system. They perform no other function, such as the amplification, regeneration or modification of a signal.

7 Heading 85.37 does not include cordless infrared devices for the remote control of television receivers or other electrical equipment (heading 85.43).

8. For the purposes of headings 85.41 and 85.42:

(a) "Diodes, transistors and similar semiconductor devices" are semiconductor devices the operation of which depends on variations in resistivity on the application of an electric field;

CHAPTER 85—*Continued*

ELECTRICAL MACHINERY AND EQUIPMENT AND PARTS THEREOF; SOUND RECORDERS AND REPRODUCERS, TELEVISION IMAGE AND SOUND RECORDERS AND REPRODUCERS, AND PARTS AND ACCESSORIES OF SUCH ARTICLES—*Continued*

(b) "Electronic integrated circuits" are:

(i) Monolithic integrated circuits in which the circuit elements (diodes, transistors, resistors, capacitors, inductances, etc.) are created in the mass (essentially) and on the surface of a semiconductor or compound semiconductor material (for example, doped silicon, gallium arsenide, silicon germanium, indium phosphide) and are inseparably associated;

(ii) Hybrid integrated circuits in which passive elements (resistors, capacitors, inductances, etc.), obtained by thin- or thick-film technology, and active elements (diodes, transistors, monolithic integrated circuits, etc.), obtained by semiconductor technology, are combined to all intents and purposes indivisibly, by interconnections or interconnecting cables, on a single insulating substrate (glass, ceramic, etc.). These circuits may also include discrete components;

(iii) Multichip integrated circuits consisting of two or more interconnected monolithic integrated circuits combined to all intents and purposes indivisibly, whether or not on one or more insulating substrates, with or without leadframes, but with no other active or passive circuit elements.

For the classification of the articles defined in this Note, headings 85.41 and 85.42 shall take precedence over any other heading in the Nomenclature, except in the case of heading 85.23,which might cover them by reference to, in particular, their function.

9. For the purposes of heading 85.48, "spent primary cells, spent primary batteries and spent electric accumulators" are those which are neither usable as such because of breakage, cutting-up, wear or other reasons, nor capable of being recharged.

Subheading Note.

Subheading 8527.12.00 cover only cassette players with built-in amplifier, without built-in loudspeaker, capable of operating without an external source of electric power and the dimensions of which do not exceed 170 mm x 100 mm x 45 mm.

VEHICLES OTHER THAN RAILWAY OR TRAMWAY ROLLING-STOCK, AND PARTS AND ACCESSORIES THEREOF

Notes.

1. This Chapter does not cover railway or tramway rolling-stock designed solely for running on rails.

2. For the purposes of this Chapter, "tractors" means vehicles constructed essentially for hauling or pushing another vehicle, appliance or load, whether or not they contain subsidiary provision for the transport, in connection with the main use of the tractor, of tools, seeds, fertilisers or other goods.

   Machines and working tools designed for fitting to tractors of heading 87.01 as interchangeable equipment remain classified in their respective headings even if presented with the tractor, and whether or not mounted on it.

3. Motor chassis fitted with cabs fall in headings 87.02 to 87.04, and not in heading 87.06.

4. Heading 8712.00 includes all children's bicycles. Other children's cycles fall in heading 9503.00.

CHAPTER 90—*Continued*

OPTICAL, PHOTOGRAPHIC, CINEMATOGRAPHIC, MEASURING, CHECKING, PRECISION, MEDICAL OR SURGICAL INSTRUMENTS AND APPARATUS; PARTS AND ACCESSORIES THEREOF—*Continued*

5. Measuring or checking optical instruments, appliances or machines which, but for this Note, could be classified both in heading 90.13 and in heading 90.31 are to be classified in heading 90.31.

6. For the purposes of heading 90.21, the expression "orthopaedic appliances" means appliances for:

(a) Preventing or correcting bodily deformities; or

(b) Supporting or holding parts of the body following an illness, operation or injury.

Orthopaedic appliances include footwear and special insoles designed to correct orthopaedic conditions, provided that they are either (1) made to measure or (2) mass-produced, presented singly and not in pairs and designed to fit either foot equally.

7. Heading 90.32 applies only to:

(a) Instruments and apparatus for automatically controlling the flow, level, pressure or other variables of liquids or gases, or for automatically controlling temperature, whether or not their operation depends on an electrical phenomenon which varies according to the factor to be automatically controlled, which are designed to bring this factor to, and maintain it at, a desired value, stabilized against disturbances, by constantly or periodically measuring its actual value; and

(b) Automatic regulators of electrical quantities, and instruments or apparatus for automatically controlling non-electrical quantities the operation of which depends on an electrical phenomenon varying according to the factor to be controlled, which are designed to bring this factor to, and maintain it at, a desired value, stabilized against disturbances, by constantly or periodically measuring its actual value.

CHAPTER 91

CLOCKS AND WATCHES AND PARTS THEREOF

Notes.

1. This Chapter does not cover:

   (a) Clock or watch glasses or weights (classified according to their constituent material);

   (b) Watch chains (heading 71.13 or 71.17, as the case may be);

   (c) Parts of general use defined in Note 2 to Section XV, of base metal (Section XV), or similar goods of plastics (Chapter 39) or of precious metal or metal clad with precious metal (generally heading No. 71.15); clock or watch springs are, however, to be classified as clock or watch parts (heading 91.14);

   (d) Bearing balls (heading 73.26 or 84.82, as the case may be);

   (e) Articles of heading 84.12 constructed to work without an escapement;

   (f) Ball bearings (heading 84.82); or

   (g) Articles of Chapter 85, not yet assembled together or with other components into watch or clock movements or into articles suitable for use solely or principally as parts of such movements (Chapter 85).

2. Heading 91.01 covers only watches with case wholly of precious metal or of metal clad with precious metal, or of the same materials combinded with natural or cultured pearls, or precious or semi-precious stones (natural, synthetic or reconstructed) of headings 71.01 to 71.04. Watches with case of base metal inlaid with precious metal fall in heading 91.02.

3. For the purposes of this Chapter, the expression "watch movements" means devices regulated by a balance-wheel and hairspring, quartz crystal or any other system capable of determining intervals of time, with a display or a system to which a mechanical display can be incorporated. Such watch movements shall not exceed 12 mm in thickness and 50 mm in width, length or diameter.

4. Except as provided in Note 1, movements and other parts suitable for use both in clocks or watches and in other articles (for example, precision instruments) are to be classified in this Chapter.

VALUE OF IMPORTED GOODS

Interpretation

1. (1) In this Schedule—

(a) "buying agent" means a person who acts for the account of a buyer of goods, rendering services in connection with finding supplies informing the seller of the wishes of the importer, collecting samples, inspecting goods and in some cases, arranging the insurance, transport, storage and delivery of the goods for a buying commission;

(b) "Customs value of imported goods" means the value of goods for the purposes of levying *ad valorem* duties of customs on imported goods;

(c) "goods of the same class or kind" means goods which fall within a group or range of goods produced by a particular industry or industry sector, and includes identical or similar goods;

(d) "identical goods" means goods produced in the same country which are the same in all respects, including physical characteristics, quality and reputation. Minor differences in appearance shall not preclude goods otherwise conforming to the definition from being regarded as identical;

(e) "identical goods" and "similar goods", as the case may be, do not include goods which incorporate or reflect engineering, development, artwork, design work, and plans and sketches for which no adjustment has been made under paragraph 8(1)*(d)*(iv) because such elements were undertaken in Trinidad and Tobago;

VALUE OF IMPORTED GOODS—*Continued*

Interpretation—*Cont'd*

(f) "produced" includes grown, manufactured and mined;

(g) "seller" means a person who has the legal or beneficial interest in the goods at the time that the contract of sale is concluded and to whom the proceeds of sale will ultimately be paid, exclusive of any commission;

(h) "similar goods" means goods produced in the same country which, although not alike in all respects, have like characteristics and like component materials which enable them to perform the same functions and to be commercially interchangeable. The quality of the goods, their reputation and the existence of a trademark are among the factors to be considered in determining whether goods are similar.

(2) For the purposes of this Schedule—

(a) a buyer and seller of goods shall be deemed to be related only where—

(i) one of them is an officer or director in a business owned or controlled by the other;

(2) Where such value cannot be determined under paragraph 3, it shall be determined by

VALUE OF IMPORTED GOODS—*Continued*

Customs Value—*Cont'd*

proceeding sequentially through paragraphs 4 to 7, inclusive to the first such paragraph under which it can be determined, subject to the proviso that, where the importer requests it and the Comptroller agrees, the order of application of paragraphs 6 and 7 shall be reversed.

(3) Except as provided for in subparagraph (2), it is only when the Customs value of imported goods cannot be determined under a particular paragraph that the provisions of the next paragraph in the sequence established by subparagraph (2) can be applied.

(4) Where the Customs value of imported goods cannot be determined under paragraphs 3 to 7 inclusive, the value shall—

(a) be determined using reasonable means consistent with the principles and general provisions of this Schedule;

(b) to the greatest extent possible, be based on previously determined Customs values; and

(c) be based on the methods of valuation laid down in paragraphs 3 to 7 inclusive, using where necessary, reasonable flexibility in their application.

(5) No Customs value shall be determined under subparagraph (4) on the basis of—

(a) the selling price in Trinidad and Tobago of goods produced in Trinidad and Tobago;

(b) a system which provides for the acceptance for Customs purposes of the higher of two alternative values;

(c) the price of goods on the domestic market of the country of exportation;

(d) the cost of production, other than computed values which have been determined for identical or similar goods in accordance with paragraph 7;

(e) the price of goods for export to a country other than Trinidad and Tobago;

(f) minimum Customs values; or

(g) arbitrary or fictitious values.

Conditions for Customs value

3. (1) The Customs value of imported goods determined under this paragraph shall be the transaction value, that is, the price actually paid or payable for the goods when sold for export to Trinidad and Tobago, adjusted in accordance with paragraph 8, and in appropriate cases paragraph 9, except that—

(a) there are no restrictions as to the disposition or use of goods by the buyer or other restrictions which—

(i) are imposed or required by law or by the public authorities in Trinidad and Tobago;

(ii) limit the geographical area in which the goods may be resold; or

(iii) do not substantially affect the value of the goods;

(b) the sale or price is not subject to some condition or consideration for which a value cannot be determined with respect to the goods being valued;

(c) no part of the proceeds of any subsequent resale, disposal or use of the goods by the buyer will accrue directly

or indirectly to the seller, unless an appropriate adjustment can be made in accordance with paragraph 8; and

(d) the buyer and seller are not related, or, where the buyer and seller are related, that the transaction value is acceptable for Customs purposes under subparagraph (2).

(2) *(a)* For the purposes of subparagraph (1), in determining whether the transaction value is acceptable, the fact that the buyer and the seller are related within the meaning of paragraph 1(2) shall not in itself be grounds for regarding the transaction value as unacceptable, but where necessary, the circumstances surrounding the sale shall be examined and the transaction value shall be accepted provided that the relationship did not influence the price. If, in the light of information provided by the importer or otherwise, the Comptroller has grounds for considering that the relationship influenced the price, he shall communicate the grounds to the importer who shall be given a reasonable opportunity to respond.

But where the value of identical or similar goods, which was utilised in determining the value in paragraph 3(2)*(b)* was subsequently adjusted, based upon discovery under section 23(2A), the value of the goods imported in a sale between related persons may also be adjusted in accordance with the adjusted value of the identical or similar goods;

(b) In a sale between related persons, the transaction value shall be accepted and the goods valued in accordance with subparagraph (1) whenever the

importer demonstrates that such value closely approximates to one of the following, occurring at or about the same time—

(i) the transaction value in sales, between buyers and sellers who are not related in any particular case of identical or similar goods for export to Trinidad and Tobago;

(ii) the Customs value of identical or similar goods, as determined under paragraph 6;

(iii) the Customs value of identical or similar goods, as determined under paragraph 7.

(3) In applying the foregoing tests, due account shall be taken of demonstrated differences in commercial levels, quantity levels, the elements enumerated in paragraph 8 and costs incurred by the seller in sales in which he and the buyer are related.

(4) The tests set forth in subparagraph (2)*(b)* shall be used at the initiative of the importer and only for comparison purposes and substitute values may not be established under that subparagraph.

(5) The price actually paid or payable is the total payment made or to be made by the buyer to or for the benefit of the seller for the imported goods. Payments may be made directly or indirectly, need not necessarily take the form of a transfer of money, and shall include—

(i) all payments made or to be made as a condition of sale of the imported goods by the buyer to the seller or by

the buyer to a third party to satisfy an obligation of the seller; and

(ii) any settlement by the buyer, whether in whole or in part, of a debt owed by the seller.

(6) Activities, including marketing activities, undertaken by the buyer on his own account, other than those for which an adjustment is provided in paragraph 8, are not considered to be indirect payment to the seller, even though they might be regarded as of benefit to the seller or have been undertaken by agreement with the seller, and their cost shall not be added to the price actually paid or payable in determining the Customs value of imported goods.

(7) The Customs value of imported goods shall not include the following charges or costs, provided that they are distinguished from the price actually paid or payable for the imported goods:

(a) charges for construction, erection, assembly, maintenance or technical assistance, undertaken after importation on imported goods such as industrial plant, machinery or equipment;

(b) Customs duties and other taxes payable in Trinidad and Tobago by reason of the importation or sale of the goods;

(c) the cost of transport after importation.

(8) ***(Deleted by Act No. 34 of 1996).***

Transaction value of identical goods

4. (1) The Customs value of imported goods determined under this paragraph shall be the transaction value of identical goods sold for export to Trinidad and Tobago and exported at or about the same time as the goods being valued but—

(a) in applying this subparagraph, the transaction value of identical goods

in a sale at the same commercial level and in substantially the same quantity as the goods being valued shall be used to determine the Customs value;

(b) where no such sale is found, the transaction value of identical goods sold at a different commercial level and in different quantities, adjusted to take account of differences attributable to commercial level and to quantity shall be used, provided that such adjustments can be made on the basis of demonstrated evidence which clearly establishes the reasonableness and accuracy of the adjustment, whether the adjustment leads to an increase or a decrease in value.

(2) Where the costs and charges referred to in paragraph 8(1)*(g)* are included in the transaction value, and adjustment shall be made to take account of significant differences in such costs and charges between the imported goods and the identical goods in question arising from differences in distances and modes of transport.

(3) In applying this paragraph—

(a) if more than one transaction value of identical goods is found, the lower or lowest such value shall be used to determine the Customs value of the imported goods;

(b) a transaction value for goods produced by a different person shall be taken into account only when no transaction value can be found for identical goods produced by the same person as the goods being valued;

VALUE OF IMPORTED GOODS—*Continued*

Transaction value of identical goods—*Cont'd*

(c) a condition for adjustment because of different commercial levels or different quantities shall be that such adjustment shall be made only on the basis of demonstrated evidence that clearly establishes the reasonableness and accuracy of the adjustment.

(4) For the purposes of this paragraph the transaction value of identical imported goods means a Customs value previously determined under paragraph 3, adjusted as provided for, in subparagraphs (1)*(b)* and (2) of this paragraph.

Transaction value similar goods

5. (1) The Customs value of imported goods determined under this paragraph shall be the transaction value of similar goods sold for export to Trinidad and Tobago and exported at or about the same time as the goods being valued but—

(a) in applying this subparagraph, the transaction value of similar goods in a sale at the same commercial level and in substantially the same quantity as the goods being valued shall be used to determine the Customs value;

(b) where no such sale is found, the transaction value of similar goods sold at a different commercial level and in different quantities, adjusted to take account of differences attributable to commercial level and to quantity, shall be used, provided that such adjustments can be made on the basis of demonstrated evidence which clearly establishes the reasonableness and accuracy of the adjustment, whether the adjustment leads to an increase or a decrease in value.

(2) Where the costs and charges referred to in paragraph 8(1)*(g)* are included in the

transaction value, an adjustment shall be made to take account of significant differences in such costs and charges between the imported goods and the similar goods in question arising from differences in distances and modes of transport.

(3) In applying this paragraph—

(a) if more than one transaction value of similar goods is found, the lowest such value shall be used to determine the Customs value of the imported goods;

(b) a transaction value for goods produced by a different person shall be taken into account only when no transaction value can be found under subparagraph (1) for similar goods produced by the same person as the goods being valued;

(c) a condition for adjustment because of different commercial levels or different quantities shall be that such adjustment shall be made only on the basis of demonstrated evidence that clearly establishes the reasonableness and accuracy of the adjustment.

(4) For the purposes of this paragraph, the transaction value of similar imported goods means a Customs value previously determined under paragraph 3, adjusted as provided for in subparagraphs (1)*(b)* and (2) of this paragraph.

Value based on unit price of greatest aggregate

6. (1) Where the imported goods or identical or similar imported goods are sold in Trinidad and Tobago in the condition as imported, the Customs value of imported goods, determined under this paragraph, shall be based on the unit quantity price at which the imported goods or identical or similar imported goods are sold in

VALUE OF IMPORTED GOODS—*Continued*

Value based on unit price of greatest aggregate—*Cont'd*

the greatest aggregate quantity, at or about the time of the importation of the goods being valued, to persons who are not related to the persons from whom they buy such goods, subject to deductions for the following:

(a) either the commissions usually paid or agreed to be paid or the additions usually made for profit, and general expenses including the direct and indirect costs of marketing the goods in question in connection with sales in Trinidad and Tobago of imported goods of the same class or kind;

(b) the usual costs of transport and insurance and associated costs incurred within Trinidad and Tobago; and

(c) the Customs duties and other taxes payable in Trinidad and Tobago by reason of the importation or sale of the goods.

(2) When neither the imported goods nor identical nor similar imported goods is sold at or about the time of importation of the goods being valued, the Customs value of imported goods determined under this paragraph shall, subject otherwise to the provisions of subparagraph (l)*(a)*, be based on the unit price at which the imported goods or identical or similar imported goods are sold in Trinidad and Tobago in the condition as imported, at the earliest date after the importation of goods being valued but before the expiration of ninety days after such importation.

(3) If neither the imported goods nor identical nor similar imported goods is sold in Trinidad and Tobago in the condition as imported, then where the Comptroller so decides, the Customs

value shall be based on the unit price at which the imported goods, after further processing, are sold in the greatest aggregate quantity to persons in Trinidad and Tobago who are not related to the persons from whom they buy such goods, due allowance being made for the value added by such processing and the deductions provided for in subparagraph (1). Where this method of valuation is used, deductions made for the value added by further processing shall be based on objective and quantifiable data relating to the cost of such work and accepted industry formulas, recipes, methods of construction and other industry practices shall form the basis of the calculations.

(4) In this paragraph, the unit price at which imported goods or identical or similar imported goods are sold in the greatest aggregate quantity is the price at which the greatest number of units is sold in sales to persons who are not related to the persons from whom they buy such goods at the first commercial level after importation at which such sales take place.

(5) Any sale in Trinidad and Tobago to a person who supplies directly or indirectly free of charge or at reduced cost for use in connection with the production and sale for export of the imported goods any of the elements specified in paragraph 8(1)*(b)*, shall not be taken into account in establishing the unit price for the purposes of this paragraph.

(6) For the purposes of subparagraph (1)*(a)*—

(a) "profit and general expenses" shall be taken as a whole, the figure for the purposes of this deduction being determined on the basis of information supplied by or on behalf of the importer unless his figures are inconsistent with those obtaining in sales of imported goods of the same

class or kind. Where the importer's figures are inconsistent with such figures, the amount for profit and general expenses may be based upon relevant information other than that supplied by or on behalf of the importer; and

(b) in determining either the commissions or the additions usually made for profit and general expenses, the question whether certain goods are of the same class or kind as other goods shall be determined on a case-by-case basis by reference to the circumstances involved and in doing this, sales for which the necessary information can be provided of the narrowest group or range of imported goods of the same class or kind as the goods being valued should be examined;

(c) "goods of the same class or kind" includes goods imported from the same country as the goods being valued as well as goods imported from other countries.

(7) For the purposes of subparagraph (2), the "earliest date" shall be the date by which sales of the imported goods or of identical or similar imported goods are made in sufficient quantity to establish the unit price.

Computed value

7. (1) The Customs value of imported goods determined under this paragraph shall be based on a computed value which shall consist of the sum of—

(a) the cost or value of materials and fabrication or other processing employed in producing the imported goods;

(b) an amount for profit and general expenses equal to that usually reflected in sales of goods of the same class or

kind as the goods being valued which are made by producers in the country of exportation for export to Trinidad and Tobago;

(c) the cost or value of the items referred to in paragraph 8(l)*(g)*.

(2) The cost or value of materials and fabrication referred to in subparagraph(1)*(a)* shall include the cost of elements specified in paragraph 8(1) and the value duly apportioned, of any element specified in paragraph 8(1)*(d)* which has been supplied directly or indirectly by the buyer for use in connection with the production of the imported goods but the value of the elements specified in paragraph 8(1)*(d)* (iv) which are undertaken in Trinidad and Tobago shall be included only to the extent that such elements are charged to the producer, no cost or value of an element referred to in this subparagraph shall be counted more than once in determining the computed value.

(3) The "cost or value" referred to in subparagraph 1*(a)* shall be determined on the basis of information relating to the production of the goods being valued supplied by or on behalf of the producer, it shall be based upon the commercial accounts of the producer, provided that these accounts are consistent with the generally accepted accounting principle applied in the country where the goods are produced.

(4) For the purposes of subparagraph 1*(b)*—

(a) the "amount for profit and general expenses" shall be taken as a whole and shall be determined on the basis of information supplied by or on behalf of the producer unless his figures are inconsistent with those usually

reflected in sales of goods of the same class or kind as the goods being valued which are made by producers in the country of exportation for export to Trinidad and Tobago:

(b) if the producer's own figures for profit and general expenses are not consistent with those usually reflected in sales of the goods of the same class or kind referred to in subparagraph *(a)* the amount for profit and general expenses may be based upon relevant information other than that supplied by or on behalf of the producer of the goods;

(c) "goods of the same class or kind" means goods imported from the same country as the goods being valued;

(d) whether goods are "of the same class or kind" as other goods shall be determined on a case-by-case basis with reference to the circumstances involved. In doing this, sales for export to Trinidad and Tobago of the narrowest group or range of goods of the same class or kind as the goods being valued for which the necessary information can be provided should be examined;

(e) "general expenses" covers the direct and indirect costs of producing and selling the goods for export which are not included under subparagraph (1)*(a)*.

Customs value includes certain charges

8. (1) In determining the Customs value under paragraph 3, there shall be added to the price actually paid or payable for the imported goods the following, to the extent that they are incurred by the buyer but are not included in the price actually paid or payable for the goods—

(a) commission and brokerage, except buying commission;

(b) the cost of containers which are treated as being one for Customs purposes with the goods in question;

(c) the cost of packing, whether for labour or materials;

(d) the value, apportioned as appropriate, of the following goods and services where supplied directly or indirectly by the buyer free of charge or at reduced cost for use in connection with the production and sale for export of the imported goods, to the extent that such value has not been included in the price actually paid or payable—

(i) materials, components, parts and similar items incorporated in the imported goods;

(ii) tools, dies, moulds and similar items used in the production of the imported goods;

(iii) materials consumed in the production of the imported goods;

(iv) engineering, development, artwork, design work, and plans and sketches undertaken elsewhere than in Trinidad and Tobago and necessary for the production of the imported goods;

(e) royalties and licence fees, which among other things, may include payments in respect of patents, trademarks and copyrights, related to the goods being valued that the buyer must pay, either directly or indirectly, as a condition of sale of the goods being valued, to the extent that such royalties and fees are not included in the price actually paid or payable;

Customs value includes certain charges—*Cont'd*

(f) the value of any part of the proceeds of any subsequent resale, disposal or use of the imported goods that accrues directly or indirectly to the seller;

(g) the cost of transport of the imported goods to the port or place of importation, the loading and handling charges associated with the transport of the imported goods to the port or place of exportation, and the cost of insurance.

(2) No additions shall be made to the price actually paid or payable in determining the Customs value except as provided in this paragraph.

(3) Additions to the price actually paid or payable shall be made under this paragraph only on the basis of objective and quantifiable data and if such do not exist a transaction value shall not be determined under the provisions of paragraph 3.

(4) In this paragraph, the term "buying commissions" means fees paid by an importer to his agent for the service of representing him abroad in the purchase of the goods being valued.

(5) Notwithstanding subparagraph (1) *(c)*—

(a) charges for the right to reproduce the imported goods in Trinidad and Tobago shall not be added to the price actually paid or payable for the imported goods in determining the Customs value; and

(b) payments made by the buyer for the right to distribute or resell the imported goods shall not be added to the price actually paid or payable for the imported goods if such payments are not a condition of the sale for export to Trinidad and Tobago of the goods.

Charges for interest not included

9. (1) Charges for interest under a financing arrangement entered into by the buyer and related to the purchase of imported goods shall not be included in the Customs value determined under paragraph 3 except that—

(a) the charges are distinguished from the price actually paid or payable for the goods;

(b) the financing arrangement has been made in writing;

(c) where required by the Comptroller, the buyer can demonstrate that—

(i) such goods are actually sold at the price declared as the price actually paid or payable; and

(ii) the claimed rate of interest does not exceed the level for such transactions prevailing in the country where, and at the time when, the finance was provided.

(2) The provisions of subparagraph (1) shall apply whether or not the finance is provided by the seller, a bank or another person, and it shall also apply, *mutatis mutandis,* where Customs value is determined under a method other than the transaction value.

SUPPLEMENTARY

The following does not form part of the Act and is published for general information:

The Customs Co-operation Council introduced the new Harmonised System for the Description and Coding of Goods in 1987. The Council of Ministers of the Caribbean Community agreed to the introduction of a new Common Market External Tariff (C.E.T.) based on the Harmonised System for the Description and Coding of Goods with effect from 1st January, 1991.

The national tariff of Trinidad and Tobago follows the format of the C.E.T. and is fully integrated, i.e. the tariff heading numbers are correlated to the Statistical Classification Number.

Importers and exporters will not be required to quote the Statistical Classification Number on their entries.

Trinidad and Tobago has agreed to the use of the metric system, and the introduction of the O.I.M.L. System and these are reflected in the tariff e.g. rates of duty for alcoholic beverages.

The Customs and Excise Division will assist any member of the public in interpreting and making use of the provisions of the Tariff.

ENTRY PROCEDURE

1. GENERAL: Under section 83 of the Customs Act, no goods shall be removed from any part of a Customs area or from a State Warehouse unless such goods have first been reported and entered. "Entered" in relation to goods imported or exported means the submission and acceptance and signature by the proper Officer of the correct form properly completed and with any prescribed bonds to cover the proposed transactions, and also, except on the entry for warehousing, the payment by the importer or exporter of any duty, tax, rent or other charges due.

Details of the forms to be used and the particulars to be shown are given below. The accuracy of those particulars is a matter of prime importance, both for the purpose of assessing any import/export duty payable and for compiling trade statistics. An entry for imported goods (other than on entry in respect of goods being transhipped) must normally be accompanied by an invoice, certificate of origin, freight slip, statement of insurance premium, packing slip, weight note, etc.

If urgent clearance of goods is required and any of the documents necessary for entering the goods properly are not available a deposit may be accepted by the Comptroller of Customs and Excise pending production of the documents. The documents must be produced within the time specified, usually three months. If the importer is unable to produce the required documents within the time specified the deposit will be credited to the revenue of the country.

2. An importer of goods valued one thousand dollars ($1000.00) and over is required to make a declaration on the prescribed form (C75 or C76), which must be completed by a representative of the importing firm itself, whether or not an agent is employed.

3. Passengers' baggage: Formal entry is not required for personal or household effects imported by a passenger in his accompanied baggage. (*See* the Second Schedule of the Cutoms Tariff for duty free allowances). These arrangements do not apply to unaccompanied baggage when formal entry must be made.

4. Forms to be used: Different entry forms are prescribed for use in different circumstances, and the appropriate form depends on the nature of the transaction. The forms commonly used are:

(a)	Customs Declaration (Import/Export)	(C82)
(b)	Bill of Sight (covered by Bond)	(C86)
(c)	Deposit Entry	(C23)
(d)	Shipping Bill for Local Produce (Aircraft Bunkers)	(C32)

5. Preparation of entries: Entries should be made up with supporting documents in as many copies as may be required by the Comptroller. Entries should be typed, printed or written thereon legibly in ink or other indelible material, and every alteration that has been made in any such form or document prior to its submission to the Comptroller of Customs and Excise or proper Officer should be made in such a manner as to leave the error as well as the correction legible. All corrections must be initialled and, if required, by the Comptroller or proper Officer, dated by the person making the correction.

6. Signatories to entries: Entries may be signed by or on behalf of the importer or exporter as follows:

(a) If an individual, by—

(i) the actual importer or exporter if the transaction is of a non-commercial nature;

(ii) a person in his employ if duly authorised by him in writing, *viz*:

(1) a licensed Customs Broker;

(2) a licensed Customs Clerk Grade III;

(3) a licensed Customs Clerk Grade II;

(4) a licensed Boarding Clerk.

"Licensed" means being licensed under the Customs Clerks and Customs Brokers Act. The Comptroller of Customs and Excise is to be notified in writing of all persons authorised to sign Customs forms and documents. Specimen signatures of all persons authorised to sign must be submitted to the Comptroller of Customs and Excise. Ch. 78:03.

7. Particulars to be given on entries include—

(a) importer and consignor: The name of the importer and the consignor must be stated on the entry. UNIT OF ACCOUNT

1. The value of the unit of account used to express the specific rates of duty of the Common External Tariff shall be 0.395833 grams of fine gold.

2. The parity of the currency of a Member State in relation to the unit of account shall be the relation between the weight of fine gold corresponding to a unit of account and the weight of fine gold corresponding to the parity of such currency as declared to the International Monetary Fund. Provided that, where a currency has no fixed parity or where the rate of exchange of such currency is allowed to float beyond the margins fixed by the International Monetary Fund, the weight of fine gold corresponding to the parity of the currency shall be determined on the basis of its exchange rate for current payments against its intervention currency and the parity of such intervention currency as declared as the International Monetary Fund; or, in case the intervention currency is on a floating exchange rate, on the basis of the gold value of that currency as derived from its market value for current payments.

3. Where a Member State changes the parity of its currency, the specific rates of duty applied by that Member State in keeping with its obligations with respect to the Common External Tariff shall be adjusted in inverse ratio to the change in its currency.

4. Where the currency of any Member State is allowed to float beyond the limits laid down under the rules of the International Monetary Fund, the Member State concerned shall adjust the specific duties applied in its national tariff in keeping with its obligations in respect of the Common External Tariff in reverse ratio to the alteration in the value of its currency, provided that, a Member State may not make such adjustment if the exchange rate of its currency varies by less than 3 per cent on either side of its value on July 3, 1973, or, in the case where adjustments have previously been made, on the date of the last of such adjustments.

5. If by a decision of the International Monetary Fund under Article 4, section 7 of its Statute there is a uniform proportionate change in the parity of all currencies then the weight of fine gold defining the unit of account shall vary in inverse ratio to such alteration. Provided, however, that where one or more Member State do not implement the decision of the International Monetary Fund, the Common Market Council shall examine the situation and shall decide on such measures as it considers necessary by majority vote.

194. Where it is shown to the satisfaction of the Comptroller that any goods are permitted to be imported or delivered from an excise warehouse without payment of duty for use in manufacturing or processing in a bonded area, or bonded factory in Trinidad and Tobago, the conditions specified in this Part shall be observed.

Entry. [11/1952 72/1993 133/2011]. Forms C82, e-C82, C84.

195. (1) On importation the goods shall be entered in as many copies as may be required by the Comptroller and the entry shall be in the Forms C82 and e-C82. The importer shall declare on the Form C84—

(a) the purpose for which it is intended that the goods will be used;

(c) that the goods will be used solely for the manufacture or process specified;

(d) that on completion of manufacture or processing none of the completed product will be removed from the bonded factory or bonded area either for (1) exportation or (2) consumption in Trinidad and Tobago until delivery has been authorised by the proper Officer.

(2) Whenever goods liable to *ad valorem* duty are imported, satisfactory documentary evidence as to value shall be produced, and unless copies are available for official certification the original invoices or other documents shall be annexed to the entry.

Security for duty. [11/1952].

196. Every manufacturer shall give such security, by bond or deposit, as the Comptroller may require—

(a) that goods, whether imported or delivered from an excise warehouse for processing or manufacture in Trinidad and Tobago shall be removed, stored and accounted for to his satisfaction; and

(b) for the payment of any duty prescribed by law on such products made from imported materials or materials delivered from an excise warehouse when they are removed for consumption within Trinidad and Tobago.

Import examination. [11/1952 72/1993].

197. (1) The examination of goods imported for manufacture or processing shall be carried out in the bonded area or bonded factory; but should the Comptroller in any special circumstances so allow, examination may be carried out at the place of importation. Any such goods imported by post shall be examined at a post office by the proper Officer unless the Comptroller in special circumstances permits otherwise.

(2) Whenever goods are removed to a bonded area for examination, the proper Officer at the place of importation shall immediately send a copy of the import entry for goods free of duty to the Officer at the bonded area or bonded factory. The goods shall be removed directly from the place of importation to the bonded area and, if not sealed, shall be accompanied by a Customs guard. Packages shall not be opened or otherwise dealt with except in the presence of, or by the authority of the proper Officer.

(3) Whenever goods are examined at the place of importation or at a post office, a copy of the entry, duly endorsed and certified by the Officer carrying out the examination, shall be sent by him immediately to the Officer in charge of the bonded area to which they are to be removed.

(4) Where goods are of a kind, class or nature which cannot be readily identified, facilities shall be given by the importer thereof for establishing their identity to the satisfaction

of the officer by stamping, plumbing, sampling or by such other means as the officer may require.

Locally distilled spirits. [11/1952].

198. Spirits distilled in Trinidad and Tobago which are to be used in the manufacture or processing of products may be removed without payment of excise duty from a warehouse to a bonded factory or bonded area subject to the provisions of the Excise enactments* relating to the removal of spirits.

Accounts. [11/1952].

199. The manufacturer shall keep accounts in a Register in such form as the Comptroller may require showing the receipt and disposal of all goods imported or received from an excise warehouse for manufacture or processing. The accounts shall show the port of importation and ship by which the goods were imported, the date and number of the entry and the quantity and description of the goods together with any marks by which the goods can be identified. In the case of locally distilled spirits received from an excise warehouse, the accounts shall show the place whence received, the date and number of the permit accompanying the spirits and the quantity and strength of the spirits. Whenever the normal records kept by the manufacture for his own information can be satisfactorily used for this purpose, the Comptroller may in his discretion accept such form of accounts and dispense with the use of an official register for keeping the required accounts. The accounts, together with all relative invoices, packing slips, permits or other documents relating to the goods shall be made available by the manufacture for inspection by the proper Officer as and when he may require.

Returns. [11/1952].

200. A return of stocks of materials imported or received from an excise warehouse without payment of duty and of articles produced therefrom shall be submitted by the manufacturer to the Comptroller at the end of each month and a return of total receipts and disposals shall be submitted by him at the end of each calendar year.

Every manufacturer shall, before he begins his operations, make entry according to Form C79 of all premises, rooms, places and machinery intended to be used by him for his business specifying the purpose for which each room, place and piece of machinery is to be used and the mark by which it is distinguished. The manufacturer shall sign the entry and deliver it to the Comptroller.

Provision of office accommodation and payment of expenses. [11/1952].

202. The manufacturer shall provide proper office accommodation for the use of Officers and all costs in connection with Customs supervision shall be borne by the manufacturer. The manufacturer shall also furnish all apparatus, tools or equipment necessary for the examination weighing or testing of materials or goods used in manufacture or processing.

B. EXPORTATION

Place of examination. [11/1952].

203. Goods entered for exportation shall be examined in the bonded area from which they are to be removed for exportation but the Comptroller may permit examinations to be carried out in such places and under such conditions as he may in any special circumstances consider suitable and necessary.

Notice to pack for export. [11/1952 72/1993] Form C80.

204. After the packing the exporter shall produce an export entry in as many copies as may be required by the Comptroller and the original export entry shall be produced by the exporter to the proper Officer at the time of shipment.

Facilities to Officer. [11/1952].

205. Facilities shall be provided by the exporter for the Office to carry out the examination of the goods and for the inspection, if required, of the exporter's books and accounts together with any documents relating to the goods. When the goods are not of a class, nature or kind which can be readily identified, facilities shall be granted by the exporter for establishing their identity to

(the place of shipment). The goods shall be produced to the Officer at the place of shipment and may be subject to such further examination as he may require.

Goods not examined at bonded premises, etc. [11/1952 72/1993].

207. When goods have not been examined prior to production at the ship's side or delivery to a post office the exporter shall hand to the Shipping Officer export entries completed and marked boldly "Ship's side Examination" and accompanied by a cancelled "notice to pack".

C. HOME CONSUMPTION
